

ZCGS150PSS - GE Monogram Stainless Steel 15" Built-In Compactor

Dimensions and Installation Information (in inches)

This compactor is designed as a built-in appliance only. It may be located in any convenient space under a countertop.

DO NOT OPERATE FREE-STANDING because the compactor will tip over when the drawer is pulled out.

Additional Specifications: A 115 Volt, 60 Hz. power supply is required. An individual properly grounded branch circuit protected by a 15- or 20-amp circuit breaker or time delay fuse is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall. Electrical outlet location is critical for proper cord storage when compactor is installed.

If the compactor is to be located in or near a corner of base cabinets, allow 6" minimum clearance from the corner for bag removal from the right side.

Front View (not to scale)
