A NOTE TO YOU

Thank you for buying a WHIRLPOOL® appliance.

Because your life is getting busier and more complicated, WHIRLPOOL appliances are easy to use, save time, and help you manage your home better. To ensure that you enjoy years of trouble-free operation, we developed this Use and Care Guide. It is full of valuable information about how to operate and maintain your appliance properly and safely. Please read it carefully.

Also, complete and mail the **Product Registration Card** provided with your appliance. The card helps us notify you about any new information on your appliance.

Please record your model's information.

Whenever you call to request service for your appliance, you need to know your complete model number and serial number. You can find this information on the model and serial number plate (see the diagram in the "Getting to Know" section). Also, record the other information shown in the next column.

TimeStrait Ties

Look for these tips!

Look for these Time Smart Tips located throughout your Use and Care Guide. They will help you save time and make the most of your new appliance.

MICROWAVE OVEN SAFETY

Your safety is important to us.

This guide contains safety symbols and statements. Please pay special attention to these symbols and follow any instructions given. Here is a brief explanation of the use of the symbol.

This symbol alerts you to hazards such as fire, electrical shock, or other injuries.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances basic safety precautions should be followed, including the following:

WARNING: To reduce the risk of burns, electric shock, fire, injury to persons, or exposure to excessive microwave energy:

- Read all instructions before using the microwave oven.
- Read and follow the specific "PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY" found in this section.
- The microwave oven must be grounded. Connect only to properly grounded outlet. See "GROUND-ING INSTRUCTIONS" found in the "Installation Instructions" section.
- Install or locate the microwave oven only in accordance with the Installation Instructions.
- Some products such as whole eggs in the shell and sealed containers – for example, closed glass jars – may explode and should not be heated in the microwave oven.
- Use the microwave oven only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in the microwave oven. This type of oven is specifically designed to heat, cook, or dry food. It is not designed for industrial or laboratory use.
- As with any appliance, close supervision is necessary when used by children.
- Do not operate the microwave oven if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.
- The microwave oven should be serviced only by qualified service personnel. Call an authorized Whirlpool service company for examination, repair, or adjustment.

- Do not cover or block any openings on the microwave oven.
- Do not store the microwave oven outdoors. Do not use the microwave oven near water – for example, near a kitchen sink, in a wet basement, or near a swimming pool, and the like.
- Do not immerse cord or plug in water.
- Keep cord away from heated surfaces.
- Do not let cord hang over edge of table or counter.
- See door surface cleaning instructions in the "Caring for Your Microwave Oven" section.
- To reduce the risk of fire in the oven cavity:
- Do not overcook food. Carefully attend the microwave oven if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
- Remove wire twist-ties from paper or plastic bags before placing bag in oven.
- If materials inside the oven should ignite, keep oven door closed, turn oven off, and disconnect the power cord, or shut off power at the fuse or circuit breaker panel.
- Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils, or food in the cavity when not in use.
- Do not mount over a sink.
- Do not store anything directly on top of the microwave oven when the microwave oven is in operation.

- SAVE THESE INSTRUCTIONS -

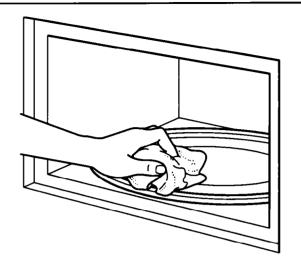

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY...

- (a) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- **(b)** Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
- (c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
 - (1) Door (bent),
 - (2) Hinges and latches (broken or loosened),
 - (3) Door seals and sealing surfaces.
- (d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

INSTALLATION INSTRUCTIONS

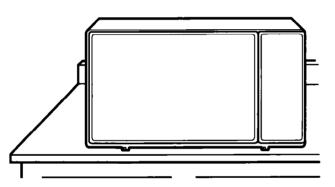

Before you begin operating the oven, carefully read the following instructions.

1. Empty the microwave oven and clean inside it with a soft, damp cloth. Check for damage such as a door that isn't lined up correctly, damage around the door, or dents inside the oven or on the exterior. If there is any damage, do not operate the oven until an authorized Whirlpool service technician has checked it and made any needed repairs.

2. Put the oven on a cart, counter, table, or shelf that is strong enough to hold the oven and the food and utensils you put in it. (The control side of the unit is the heavy side. Use care when handling the oven.) The weight of the oven is about 40 lbs. The microwave oven should be at a temperature above 50°F (10°C) for proper operation.

NOTE: You can build your microwave oven into a wall or cabinet by using one of the trim kits listed in the "Built-in kits" section.

AWARNING

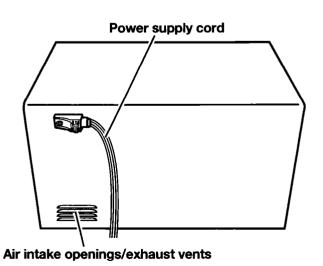

Fire Hazard

Do not install the oven next to or over a heat source without a UL approved trim kit.

Doing so can result in death, fire, or electrical shock.

NOTE: Do not block the exhaust vents or rear air intake openings. Allow a few inches of space at the back of the oven where the intake openings are located. Blocking the air intake openings and exhaust vents could cause damage to the oven and poor cooking results. Make sure the microwave oven legs are in place to ensure proper airflow. If vents are blocked, a sensitive thermal safety device automatically turns the oven off. The oven will not work until it has cooled enough.

ELECTRICAL REQUIREMENTS

Observe all governing codes and ordinances. A 120 Volt, 60 Hz, AC only, 15 amp fused electrical supply is required. (A time-delay fuse is recommended.) It is recommended that a separate circuit serving only this appliance be provided.

AWARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

GROUNDING INSTRUCTIONS

For all cord connected appliances:
The microwave oven must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. The microwave oven is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed

WARNING: Improper use of the grounding can result in a risk of electric shock.

and grounded.

Consult a qualified electrician or serviceman if the grounding instructions are not completely understood, or if doubt exists as to whether the microwave oven is properly grounded.

Do not use an extension cord. If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the microwave oven.

For a permanently connected appliance: This appliance must be connected to a grounded, metallic, permanent wiring system, or an equipment grounding conductor should be run with the circuit conductors and connected to the equipment grounding terminal or lead on the appliance.

GETTING TO KNOW YOUR MICROWAVE OVEN

This section discusses the concepts behind microwave cooking. It also shows you the basics you need to know to operate your microwave oven. Please read this information before you use your oven.

AWARNING

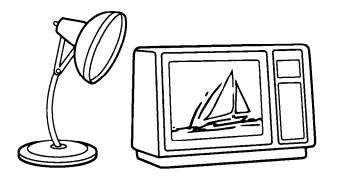

Explosion Hazard

Do not store flammable materials such as gasoline near the microwave oven. Doing so can result in death, explosion, fire, or burns.

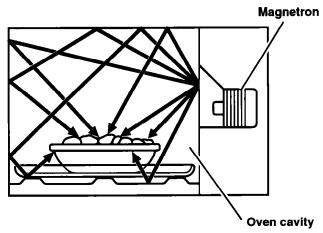

How your microwave oven works

Microwave ovens are safe. Microwave energy is not hot. It causes food to make its own heat, and it's this heat that cooks the food.

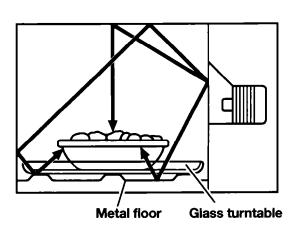

Microwaves are like TV waves or light waves. You cannot see them, but you can see what they do.

A magnetron in the microwave oven produces microwaves. The microwaves move into the oven where they contact food as it turns on the turntable.

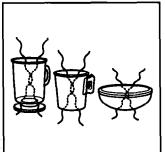

The glass turntable of your microwave oven lets microwaves pass through. Then they bounce off a metal floor, back through the glass turntable, and are absorbed by the food.

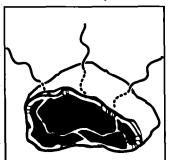

HOW YOUR MICROWAVE OVEN WORKS (CONT.)

Microwaves pass through most glass, paper, and

plastics without heating them so food absorbs the energy. Microwaves bounce off metal containers so food does not absorb the energy.

Microwaves may not reach the center of a roast.

The heat spreads to the center from the outer, cooked areas just as in regular oven cooking. This is one of the reasons for letting some foods (for example, roasts or baked potatoes) stand for a while after cooking, or for stirring

some foods during the cooking time.

The microwaves disturb water molecules in the food. As the molecules bounce around bumping into each other, heat is made, like rubbing your hands together. This is the heat that does the cooking.

TimeSystem 1FS

For the best cooking results

- Always cask food for the shortest cooking time recommended. Check to see how the food is cooking if needed, touch the scio manute pad while the over is operating or after the oppositio cycle is over fisee the Tirsing and installed section.
- Stir turn over at rearrange the food being cooked about halfway through the cooking time for all recipes. This will help make acre the food is evenly cooked.
- If you do not have a cover for a dish, use wax paper, or microwave approved paper towels or plastic wrap. Homember to turn back a comer of the plastic wrap to veri Great Colleg Goding.

NOTE: Do not deep fry in the oven. Microwavable utensils are not suitable and it is difficult to maintain appropriate deep frying temperatures.

RADIO INTERFERENCE

Using your microwave oven may cause interference to your radio, TV, or similar equipment. When there is interference, you can reduce it or remove it by:

- Cleaning the door and sealing surfaces of the oven.
- Adjusting the receiving antenna of the radio or television.
- Moving the receiver away from the microwave
- Plugging the microwave oven into a different outlet so that the microwave oven and receiver are on different branch circuits.

TESTING YOUR MICROWAVE OVEN

To test the oven put about 1 cup of cold water in a

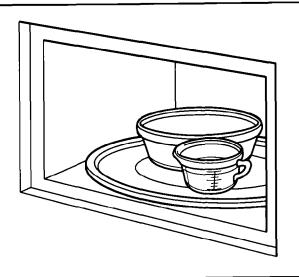

glass container in the oven. Close the door. Make sure it latches. Follow the directions in the "Cooking at high cook power" section to set the oven to cook for 2 minutes. When the time

is up, the water should be heated.

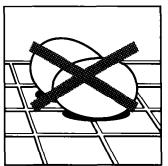

TESTING YOUR DINNERWARE OR COOKWARE

Test dinnerware or cookware before using. To test a dish for safe use, put it into the oven with a cup of water beside it. Cook at 100% cook power for one minute. If the dish gets hot and water stays cool, do not use it. Some dishes (melamine, some ceramic dinnerware, etc.) absorb microwave energy, becoming too hot to handle and slowing cooking times. Cooking in metal containers not designed for microwave use could damage the oven, as could containers with hidden metal (twistties, foil lining, staples, metallic glaze or trim).

OPERATING SAFETY PRECAUTIONS

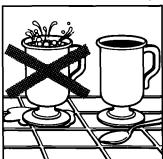

Never cook or reheat a whole egg inside the

shell. Steam buildup in whole eggs may cause them to burst and burn you, and possibly damage the oven. Slice hard-boiled eggs before heating. In rare cases, poached eggs have been known to explode. Cover poached eggs and

allow a standing time of one minute before cutting into them.

For best results, stir any liquid several times

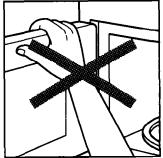

before heating or reheating. Liquids heated in certain containers (especially containers shaped like cylinders) may become overheated. The liquid may splash out with a loud noise during or after heating or when adding ingredients

(coffee granules, tea bags, etc.). This can harm the oven and possibly injure someone.

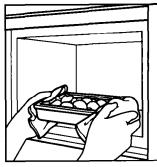

Never lean on the door or allow a child to swing on it

when the door is open. Injury could result.

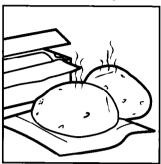

Use hot pads. Microwave energy does not heat

containers, but the heat from the food can make the container hot.

OPERATING SAFETY PRECAUTIONS (CONT.)

Do not overcook potatoes. Fire could result. At

the end of the recommended cooking time. potatoes should be slightly firm because they will continue cooking during standing time. After microwaving, wrap potatoes in foil and set aside for 5 minutes. They will finish cooking while standing.

Do not start a microwave oven when it is empty.

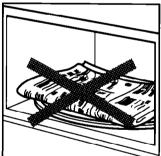

Product life may be shortened.

If you practice programming the oven, put a container of water in the oven.

It is normal for the oven door to look wavv after the oven has been running for a while.

Do not use newspaper or other printed paper in the oven. Fire could result.

Do not dry flowers. fruit, herbs, wood, paper, gourds, or clothes in the oven. Fire could result.

Do not try to melt paraffin wax in the oven. Paraffin

wax will not melt in a microwave oven because it allows microwaves to pass through it.

Do not operate the microwave oven unless the glass

turntable is securely in place and can rotate freely. The turntable can rotate in either direction.

Make sure the support base is all the way on the shaft in the oven cavity floor. Make sure the support rollers are completely inside the center circle of the turntable;

fuse box

this will let the turntable rotate properly.

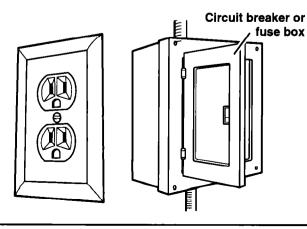

Make sure the turntable is correct-side up in the oven. Carefully place the cookware on your turntable to avoid possibly breaking it.

Handle your turntable with care when removing it from the oven to avoid possibly breaking it. If your turntable cracks or breaks, contact your Whirlpool dealer for a replacement.

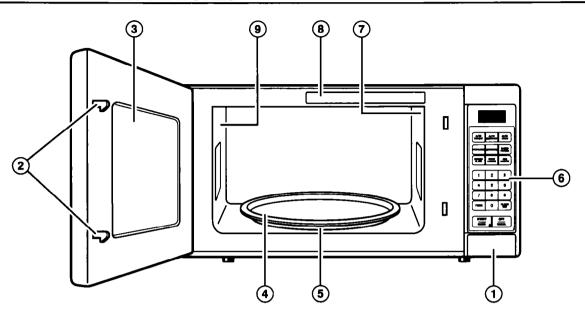

When you use a browning dish, the browning dish bottom must be at least 3/16 inch above the turntable. Follow the directions supplied with the browning dish.

ELECTRICAL CONNECTION

If your electric power line or outlet voltage is less than 110 volts, cooking times may be longer. Have a qualified electrician check your electrical system.

MICROWAVE OVEN FEATURES

Your microwave oven is designed to make your cooking experience as enjoyable and productive as possible. To help get you up and running quickly, the following is a list of the oven's basic features:

- **1. One-Touch Door Open Button.** Push this button to open the door.
- **2. Door Safety Lock System.** The oven will not work unless the door is securely closed.
- Window with Metal Shield. The shield prevents microwaves from escaping. It is designed as a screen to allow you to view food as it cooks.
- **4. Glass Turntable.** This turntable turns food as it cooks for more even cooking. It must be in the oven during operation for best cooking results. See pages 7, 10, 36, and 45 for more details.

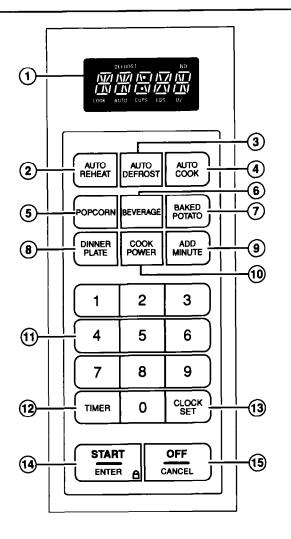

- 5. Removable Turntable Support (under turntable).
- **6. Control Panel.** Touch pads on this panel to perform all functions. See pages 12-13 for more information.
- **7. Light.** The light automatically turns on when the door is opened or when the oven is running.
- 8. Cooking Guide Label.
- 9. Model and Serial Number Plate.

NOTE: This microwave oven is available in both Designer Black[™] and Designer White[™] models.

CONTROL PANEL FEATURES

Your microwave oven control panel lets you choose the cooking function you want quickly and easily. All you have to do is touch the necessary command pad. The following is a list of all the command and number pads located on the control panel. For more information, see pages 14-35.

- Display. This display includes a clock and indicators to tell you the time of day, cooking time settings, and cooking functions you chose.
- AUTO REHEAT. Touch this pad to reheat food, without needing to enter a cook power or time. See page 33 for more information.
- **3. AUTO DEFROST.** Touch this pad to thaw frozen food by weight. See page 25 for more information.
- 4. AUTO COOK. Touch this pad to cook common microwave-prepared foods, without needing to enter a cook power or time. See page 23 for more information.
- **5. POPCORN.** Touch this pad to pop popcorn, without needing to enter a cook power or time. See page 28 for more information.
- **6. BEVERAGE.** Touch this pad to reheat a beverage, without needing to enter a cook power or time. See page 30 for more information.
- 7. BAKED POTATO. Touch this pad to bake potatoes, without needing to enter a cook power or time. See page 32 for more information.
- **8. DINNER PLATE.** Touch this pad to reheat a dinner-sized plate of refrigerated food, without needing to enter a cook power or time. See page 31 for more information.
- 9. ADD MINUTE. Touch this pad to cook for one minute at 100% cook power or to add an extra minute to your cooking cycle. See page 34 for more information.
- 10. COOK POWER. Touch this pad, after the cook time has been set, followed by a number pad to set the amount of microwave energy released to cook the food. The higher the number, the higher the power or faster the "cooking speed." See page 18 for more information. See the "Microwave cooking chart" on page 38 for specific cook powers to use for the foods you are cooking.
- Number pads. Touch number pads to enter cooking times, cook powers, quantities, or weights.
- **12. TIMER.** Touch this pad to set the minute timer. See page 16 for more information.

CONTROL PANEL FEATURES (CONT.)

- **13. CLOCK SET.** Touch this pad to enter the correct time of day. See page 14 for more information.
- **14. START/ENTER.** Touch this pad to start a function you have set.
- **15. OFF/CANCEL.** Touch this pad to erase an incorrect command or to cancel a program during cooking. This pad will not erase the time of day.

NOTE: If you try to enter unacceptable instructions, "ERROR" will appear on the display. Touch the off/cancel pad and re-enter the instructions.

Audible signals

Your microwave oven comes with audible signals that can guide you when setting and using your oven:

- A programming tone will sound each time you touch a pad.
- A single long tone signals the end of a cooking cycle or minute timer function.
- To cancel the tones, touch number pad 1 for 4 seconds. To turn the tones back on, touch number pad 1 again for 4 seconds.

Interrupting cooking

You can stop the oven during a cycle by opening the door. The oven stops heating and the fan stops, but the light stays on. To restart cooking, close the door and

TOUCH

If you do not want to continue cooking:

Close the door and the light goes off.

ΩR

• TOUCH

NOTE: Before setting a function, touch the off/cancel pad to make sure no other function is on.

Using the safety lock

The safety lock locks the control panel so others cannot use the microwave when you do not want them to.

To lock the control panel:

TOUCH

for 4 seconds

"LOCK" will appear on the display if a pad is touched.

To unlock the control panel:

TOUCH

for 4 seconds

Using the learning feature

You can set your microwave oven to display your commands as you enter them without turning the oven on. This feature helps you learn to use your oven without actually cooking food.

To set the learning feature:

TOUCH

for 5 seconds

"DEMO" will appear on the display.

To cancel the learning feature:

TOUCH

for 5 seconds

BUILT-IN KITS

You can build in your microwave oven by using one of the following trim kits. These kits are available from your Whirlpool Dealer. If your dealer does not stock the kit you can order it, by kit part number, by calling **1-800-253-1301** and following the instructions and telephone prompts you hear.

SIZE	COLOR	KIT MODEL NO.	FOR INSTALLATION OVER WHIRLPOOL OVEN MODEL

SETTING THE CLOCK

When you first plug in your microwave oven, the display flashes "88:88." If the electric power ever goes off, the display will again flash all 8's when the power comes back on.

NOTES:

- You can cook without setting the clock, but the display will not show the correct time of day after cooking.
- To reset the clock, touch the clock set pad. A "0" will show on the display. Continue to set the clock as shown on the next page.
- If you have touched in an incorrect time, such as 12:65, "ERROR" will show on the display. Touch the off/cancel pad, then touch the clock set pad and start over.

SETTING THE CLOCK (CONT.)

1. Choose the setting.	TOUCH OFF CANCEL TOUCH CLOCK SET	YOU SEE YOU SEE
2. Enter the time of day. Example for 3:25:	3 2 5	YOU SEE
3. Complete your entry.	CLOCK SET OR START ENTER	YOU SEE

USING THE MINUTE TIMER

You can use your microwave oven as a kitchen timer. Use the minute timer for timing up to 99 minutes, 99 seconds.

NOTES:

- To see the time of day while the minute timer is counting down, touch the clock set pad.
- If you want to use other command pads while the minute timer is counting down, touch the off/ cancel pad to cancel the minute timer.
- **1.** Enter the time to be counted down.

Example for 3 minutes:

TOUCH

		(time of day)

COOKING AT DIFFERENT COOK POWERS

For best results, some recipes call for different cook powers. The lower the cook power, the slower the cooking. Each number pad also stands for a different percentage of cook power. Many microwave cookbook recipes tell you by number, percent, or name which cook power to use.

The following chart gives the percentage of cook power each number pad stands for, and the cook power name usually used. It also tells you when to use each cook power. Follow recipe or food package instructions if available.

NOTE: Refer to a reliable cookbook for cooking times.

		1401E: Relei to a reliable econbook for esercing time
COOK POWER	NAME	WHEN TO USE IT
100% of full power	High	 Quick heating many convenience foods and foods with high water content, such as soups and beverages
		 Cooking small tender pieces of meat, ground meat, poultry pieces, fish fillets, and vegetables
9=90% of full power		Heating cream soups
8=80% of full power		Heating rice, pasta, or casseroles
7=70% of full power	Medium-High	 Cooking and heating foods that need a cook power lower than high (for example, whole fish and meat loaf) or when food is cooking too fast
		Reheating a single serving of food
6=60% of full power		 Cooking requiring special care, such as cheese and egg dishes, pudding, and custards
		Finishing cooking casseroles
5=50% of full power	Medium	Cooking ham, whole poultry, and pot roastsMelting chocolate
4=40% of full power		Simmering stews
·		Heating pastries
3=30% of full power	Medium-Low, Defrost	 Defrosting foods, such as bread, fish, meats, poultry, and precooked foods
2=20% of full power		 Softening butter, cheese, and ice cream
1=10% of full power	Low	Keeping food warm
		 Taking chill out of fruit

COOKING AT DIFFERENT COOK POWERS (CONT.)

Changing or adding instructions

You can change times or cook powers, or add cycles any time before or after touching the start/enter pad:

- Touch the off/cancel pad twice.
- Enter your new instructions.

USING AUTO COOK

Cooking with AUTO COOK lets you cook common microwave-prepared foods without needing to set times and cook powers. AUTO COOK has preset times and cook powers for six major food categories: Fresh Vegetables, Frozen Vegetables, Rice, Ground Meat, Fish Fillets, and Frozen Main Dish.

All you do is touch the auto cook pad, then enter the amount being cooked. Your microwave oven does the rest.

NOTE: If you want to cook by entering a time and cook power, see the "Microwave cooking chart" in the "Cooking Guide" section.

- 1. Put your food in the oven and close the door.
- 2. Choose the setting.

Example for Setting 2 (Frozen Vegetables):

NOTE: See the "Auto cook chart" or the Cook Guide Label on the frame behind the door for the food settings available.

TOUCH

AUTO COOK

twice

YOU SEE

3. Enter the amount of items to be heated.

Example for 3 items:

TOUCH

3

YOU SEE

4. Start the oven.

TOUCH

YOU SEE

(display counts down cooking time)

5. When the cooking time ends, a long tone will sound and the oven will stop.

NOTE: Different words will appear on the display depending upon which food you are cooking.

YOU SEE

(example)

YOU SEE

(time of day)

The display will show the time of day when you open the door.

AUTO COOK CHART

nuiv tu			AITITY	
SETTING	COOK PAD	MT6120XE	MT9160XE	PROCEDURE
Fresh Vegetables	once	1-6 cups	1-8 cups	For beans, carrots, corn, and peas add 1 table-spoon of water per cup. For broccoli, brussels sprouts, cabbage, and cauliflower cook immediately after washing with no additional water. If you like tender, crisp vegetables, double or triple the quantity per setting. For example, use 2 or 3 cups of zucchini, but touch number pad 1 for one cup. After cooking, remove from the oven, stir, cover, and let stand 3 to 5 minutes before serving.
Frozen Vegetables	twice	1-6 cups	1-8 cups	Cover with lid or plastic wrap. Let stand 3 minutes, covered.
				NOTE: To select an amount when cooking a 10 oz package of frozen vegetables (this equals about 1½ cups), touch "1" for 1 cup of "tender crisp" vegetables (you cannot enter ½ cup amounts) or touch "2" for two cups of vegetables more fully cooked.
Rice	3 times	0.5-2 cups	0.5-2 cups	Use this setting to cook rice by selecting the number pads. For ½ cup, touch 5; for 1 cup, touch 1 and 0; for 1.5 cups, touch 1 and 5; and for 2 cups touch 2 and 0. Place rice into a deep casserole. Cover with a lid or plastic wrap. After cooking, stir, cover and let stand 3-5 minutes or until all liquid has been absorbed.
Ground Meat	4 times	0.3-2.0 lbs	0.3-2.0 lbs	Use this setting to cook ground beef or turkey as patties or in a casserole to be added to other ingredients. Place patties on a microwave-safe rack and cover with wax paper. Place ground meat in a casserole and cover with wax paper or plastic wrap. When oven stops and "TURN OVER" is displayed, turn patties over or stir meat in casserole to break large pieces. Re-cover and touch the start/enter pad. After cooking, let stand, covered, for 2-3 minutes.
Fish Fillets	5 times	0.5-2.0 lbs	0.5-2.0 lbs	Use this setting for fresh or defrosted fish fillets. Arrange in a pie plate or shallow casserole in a single layer. Tuck thin ends under to prevent overcooking. Cover with vented plastic wrap. After cooking, let stand, covered, for 1-3 minutes.
Frozen Main Dish	6 times	6-8 oz 9-11 oz 12-14 oz 15-17 oz	6-8 oz 9-11 oz 12-14 oz 15-17 oz	Use this pad for frozen convenience foods. It will give you satisfactory results for most brands. Remove lid from container and place frozen main dish in oven. Touch AUTO COOK Pad 6 times for frozen main dish. Then enter the food's weight by touching the number pads and touch START/ENTER. Heat only one main dish at a time.

NOTE: If you enter an amount not shown in the chart above, "ERROR" will appear. AUTO COOK will only operate with the amounts shown.

USING AUTO DEFROST

Your microwave oven automatically defrosts a variety of common meats at preset cook powers for preset times. The 3-stage AUTO DEFROST cycle defrosts ground meat, steaks, chops, fish, and chicken pieces. All you do is touch AUTO DEFROST, then enter the weight of the items being defrosted. Your microwave oven does the rest.

- If "ERROR" appears on the display, touch the off/cancel pad and start over.
- To defrost items not listed in AUTO DEFROST, use a cooking time and 30% cook power. Let the food stand after defrosting. Refer to a reliable cookbook for defrosting information.

NOTES:

- If you want to change the defrost time after choosing AUTO DEFROST, see the "Adding or subtracting cooking time" section.
- Put your frozen food in the oven and close the door.

 Touch the auto defrost pad. Example for Ground Meat (Setting 1): NOTE: See the "Auto defrost chart" for the settings available. 	AUTO DEFROST	YOU SEE DEFROST AUTO LBS
3. Enter the food's weight. Touch number pads. Example for 1.0 lbs:	тоисн 1	YOU SEE DEFROST AUTO LBS.
	0	

4. Start the oven.

TOUCH YOU SEE

START
ENTER A

DEFROST

(example: display counts down defrosting time in first stage)

continued on next page

USING AUTO DEFROST (CONT.)

5. After the first stage is over, four tones will sound and the oven will stop.

Open the door, pull apart your meat, and remove the defrosted portion from the oven.

YOU SEE

6. Close the door.

TimeSkyeif* TiPS

For even, complete defrosting

- The shape of the package affects how quickly food will defrost. Shallow packages will defrost more quickly than a deep block.
- As food begins to defrost, separate the pieces. Separated pieces defrost more easily.
- Use small pieces of aluminum foil to shield parts of food such as chicken wings, leg tips, fish tails, or areas that start to get warm. Make sure the foil does not touch the sides, top, or bottom of the oven. The foil can damage the oven lining.

YOU SEE

USING AUTO DEFROST (CONT.)

7. Restart the oven.

NOTE: The oven stops again after the second stage to let you check your food.

TOUCH

START ENTER A **YOU SEE**

(example: display counts down defrosting time in second stage)

8. When the defrosting time ends, a long tone will sound and the oven will stop.

YOU SEE

YOU SEE

(time of day)

The display will show the time of day when you open the door.

AUTO DEFROST CHART

SETTING	TOUCH AUTO DEFROST PAD	QUANTITY	PROCEDURE
Ground Meat	once	0.5-3.0 lbs.	Remove any thawed parts after each stage. Stand, 5-10 minutes.
Steaks/Chops/Fish	twice	0.5-4.0 lbs.	After the 1st stage, turn over and shield any warm portions with aluminum foil.
			After the 2nd stage, shield any warm portions with aluminum foil.
			Cover. Stand, 10-20 minutes.
Chicken Pieces	3 times	0.5-3.0 lbs.	After the 1st stage, pull apart and rearrange.
			After the 2nd stage, if there are warm or thawed portions, rearrange and cover edges. Stand, 10-20 minutes.

NOTE: To defrost items not listed in AUTO DEFROST, use 30% cook power.

DEFROSTING TIPS

- When using AUTO DEFROST, you need to enter the net weight (the weight of the food minus the container). Enter the weight to the nearest 1/10 lb.
- Only use AUTO DEFROST for raw food. AUTO DEFROST gives best results when the food to be thawed is completely frozen. If the food is partially defrosted, always set a lower food weight (for a shorter defrosting time) to prevent cooking the food.
- For better results, a preset standing time is included in the defrosting time. This may make the defrosting time seem longer than expected. (For more information on standing time, see the "Microwave cooking tips" in the "Cooking Guide" section.)

USING POPCORN

POPCORN lets you pop commercially packaged microwave popcorn by touching just one pad. Pop only one package at a time. If you are using a microwave popcorn popper, follow the manufacturer's instructions. You can set your microwave oven to pop different types of popcorn in different size bags. You specify the setting by the number of times you touch POPCORN.

To correctly set your microwave oven, follow this chart:

BAG SIZE (OZ)	3.5	3.0 or 3.5	1.75	1.5 or 1.75
POPCORN TYPE	Reg Size	Light Reg Size	Snack Size	Light Snack Size
TOUCH POPCORN	once	twice	3 times	4 times

AWARNING

Fire Hazard

Do not repop unpopped kernels.

Do not reuse popcorn bags.

Doing so can result in death, fire, or burns.

TimeSiggii TIPS

Popcorn brands make a difference

clow well your popour cooks will depend on the brand of popour and how much fall time in it. Try several brands to decide which pops the best. For best results, use resh bags of popour.

NOTES:

- Before using POPCORN, be sure the time of day is showing on the display. If the time of day is not on the display, touch the off/cancel pad once or twice.
- If you want to change the popping time after choosing POPCORN, see the "Adding or subtracting cooking time" section.

USING POPCORN (CONT.)

2. Touch the popcorn pad. Example for 3.5 oz regular bags:	POPCORN	YOU SEE
After 2 seconds:		YOU SEE (display counts down popping time)
3. When the popping time ends, a long tone will sound and the oven will stop.		YOU SEE
The display will show the time of day when you open the door.		YOU SEE

USING BEVERAGE

BEVERAGE lets you heat a beverage by touching just one pad.

NOTES:

- Before using BEVERAGE, be sure the time of day is showing on the display. If the time of day is not on the display, touch the off/cancel pad once or twice to bring it up.
- If you want to change the heating time after choosing BEVERAGE, see the "Adding or subtracting cooking time" section.
- **1.** Place a cup of a beverage in the oven and close the door.
- **2.** Choose the size of the beverage.

Each time you touch the beverage pad, the displayed size goes up by 0.5 cup, up to 2.0 cups.

To heat a half cup of a beverage:

TOUCH

BEVERAGE

once

YOU SEE

(display counts down heating time)

3. When the heating time ends, a long tone will sound and the oven will stop.

Remove the beverage from the oven and gently stir it to make temperature even.

The display will show the time of day when you open the door.

YOU SEE

YOU SEE

(time of day)

USING DINNER PLATE

DINNER PLATE lets you reheat a dinner-size plate of refrigerated food.

NOTES:

- Before using DINNER PLATE, be sure the time of day is showing on the display. If the time of day is not on the display, touch the off/cancel pad once or twice to bring it up.
- If you want to change the heating time after choosing DINNER PLATE, see the "Adding or subtracting cooking time" section.
- Place a plate of food in the oven and close the door.

TimeState* TIPS

Preparing your plate

Place meet and bulky vegetables to the outside of the plate. Cover the plate with wax paper.

2. Choose the size of the dinner plate. Touch the dinner plate pad once for regular, twice for large, 3 times for small.

To heat a small dinner plate:

After 3 seconds:

TOUCH

DINNER PLATE

3 times

YOU SEE

YOU SEE

The display will show the time of day when you open the door.

USING BAKED POTATO

BAKED POTATO lets you bake 1-6 potatoes (for Model MT6120XE) or 1-8 potatoes (for Model MT9160XE) by touching just one pad.

NOTES:

- Before using BAKED POTATO, be sure the time of day is showing on the display. If the time of day is not on the display, touch the off/cancel pad once or twice to bring it up.
- If you want to change the cooking time after choosing BAKED POTATO, see the "Adding or subtracting cooking time" section.
- **1.** Place pierced potato(es) in the oven and close the door.

TimeSmarr TIPS

For a better baked potato

Sefors taking, remember to pierce the potatoles) with a fork several times. After cooking, let the potatoles) stand 5 minutes wrapped in foil.

2. Choose the number of potatoes. Touch the baked potato pad once for each potato.

Example for 4 potatoes:

After 3 seconds:

TOUCH

BAKED POTATO

4 times

AUTO REHEAT CHART

	TOUCH AUTO	QUANTITY		
SETTING	REHEAT PAD	Model MT6120XE	Model MT9160XE	
Pasta/Casserole	once	1-6 cups	1-8 cups	
Roll/Muffin, Fresh	twice	1-8 pieces	1-10 pieces	
Roll/Muffin, Frozen	3 times	1-8 pieces	1-10 pieces	
Pizza Slice	4 times	1-6 slices	1-6 slices	
Soup	5 times	1-4 cups	1-6 cups	

USING ADD MINUTE

ADD MINUTE lets you cook food for one minute at 100% cook power or add an extra minute to your cooking cycle. You can also use it to extend cooking time in one-minute amounts.

NOTES:

- To extend cooking time while you are cooking, touch the add minute pad once for each extra minute.
- You can enter ADD MINUTE only after closing the door, after touching the off/cancel pad, or during cooking.
- If you touch the add minute pad during cooking, the oven will cook at the cook power you have set. If you touch the add minute pad after cooking, the oven will cook at 100% cook power.
- You can use ADD MINUTE only with timed cooking.
- You can only use ADD MINUTE to start the oven if no other cooking function is running.

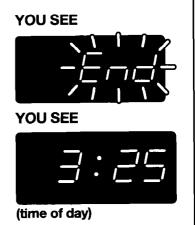

1. Make sure your food is in the oven.

2. Touch the add minute pad.	TOUCH	YOU SEE
Example when cooking for one minute:	ADD MINUTE once	соок
Example when increasing the time during cooking for 7 minutes, 16 seconds:	ADD MINUTE	YOU SEE
	ADD MINUTE again	덕. /낙

USING ADD MINUTE (CONT.)

3. When the cooking time ends, a long tone will sound and the oven will stop.

The display will show the time of day when you open the door.

ADDING OR SUBTRACTING COOKING TIME

If a preset cooking time is too long or too short, you can increase or decrease the cooking time by 7% after choosing the function.

NOTE: When changing cooking time for POPCORN, BEVERAGE, BAKED POTATO, or DINNER PLATE, you must touch the COOK POWER Pad within three seconds after the last time you touched the chosen function's command pad. Otherwise, cooking will start automatically in three seconds.

To increase cooking time by 7%:

To decrease cooking time by 7%:

CARING FOR YOUR MICROWAVE OVEN

To make sure your microwave oven looks good and works well for a long time, you should maintain it properly. For proper care, please follow these instructions carefully.

For interior surfaces: Wash often with warm, sudsy water and a sponge or soft cloth. Use only mild, nonabrasive soaps or a mild detergent. Be sure to keep the areas clean where the door and oven frame touch when closed. Wipe well with clean water. Over time, stains can occur on the surfaces as the result of food particles spattering during cooking. This is normal.

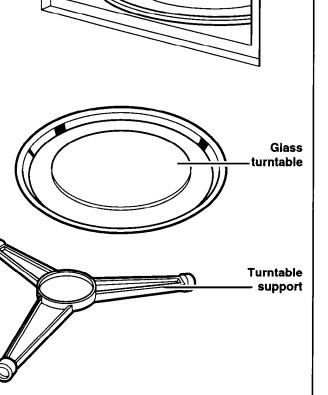

For stubborn soil, **boil** a cup of water in the oven for 2 or 3 minutes. Steam will soften the soil. To get rid of odors inside the oven, **boil** a cup of water with lemon juice or vinegar.

For exterior surfaces and control panel: Use a soft cloth with spray glass cleaner. Apply the spray glass cleaner to the soft cloth; do not spray directly on the oven.

NOTE: Abrasive cleansers, steel-wool pads, gritty wash cloths, some paper towels, etc., can damage the control panel and the interior and exterior oven surfaces.

To clean turntable and turntable support, wash in mild, sudsy water; for heavily soiled areas use a mild cleanser and scouring sponge. The turntable and turntable support are dishwasher-safe.

COOKING GUIDE

REHEATING CHART

Times are approximate and may need to be adjusted to individual taste.

NOTE: See "Using auto reheat" in the "Using Your Microwave Oven" section for instructions on how to reheat without cooking time and cook power.

ITEM	STARTING TEMPERATURE	MICROWAVE TIME	PROCEDURE
Plate of Food 1 serving of meat 2 servings of vegetables	Room temp. Refrigerated	MEDIUM - HIGH (70%) 1½ -2¾ min. 2¾-4 min.	Meaty portion and bulky vegetables to outside. Cover with wax paper.
Meat (Chicken pieces, chops, hamburgers, meat loaf slices) 1 serving 2 servings	Refrigerated Refrigerated	MEDIUM - HIGH (70%) 1-2 min. 2-4 min.	Cover loosely with wax paper.
Meat Slices (Beef, ham, pork, turkey) 1 or more servings	Room temp. Refrigerated	MEDIUM (50%) 1-1¾ min. per serving 1½-2½ min. per serving	Cover with gravy or wax paper. Check after 30 sec. per serving.

MICROWAVE COOKING TIPS

Amount of food

• If you increase or decrease the amount of food you prepare, the time it takes to cook that food will also change. For example, if you double a recipe, add a little more than half the original cooking time. Check for doneness and, if necessary, add more time in small increments.

Starting temperature of food

 The lower the temperature of the food being put into the microwave oven, the longer it takes to cook. Food at room temperature will be reheated more quickly than food at refrigerator temperature.

Composition of food

- Food with a lot of fat and sugar will be heated faster than food containing a lot of water. Fat and sugar will also reach a higher temperature than water in the cooking process.
- The more dense the food, the longer it takes to heat. "Very dense" food like meat takes longer to reheat than lighter, more porous food like sponge cakes.

Size and shape

- Smaller pieces of food will cook faster than larger pieces. Also, same-shaped pieces cook more evenly than different-shaped pieces.
- With foods that have different thicknesses, the thinner parts will cook faster than the thicker parts. Place the thinner parts of chicken wings and legs in the center of the dish.

Stirring, turning foods

 Stirring and turning foods spreads heat quickly to the center of the dish and avoids overcooking at the outer edges of the food.

Covering food

Cover food to:

- Reduce splattering
- Shorten cooking times
- Keep food moist

You can use any covering that lets microwaves pass through.

Releasing pressure in foods

Several foods (for example: baked potatoes, sausages, egg yolks, and some fruits) are tightly covered by a skin or membrane. Steam can build up under the membrane during cooking, causing the food to burst. To relieve the pressure and to prevent bursting, pierce these foods before cooking with a fork, cocktail pick, or toothpick.

Using standing time

- Always allow food to stand after cooking. Standing time after defrosting and cooking allows the temperature to evenly spread throughout the food, improving the cooking results.
- The length of the standing time depends on how much food you are cooking and how dense it is. Sometimes it can be as short as the time it takes you to remove the food from the oven and take it to the serving table. However, with larger, denser food, the standing time may be as long as 10 minutes.

MICROWAVE COOKING TIPS (CONT.)

Arranging food

For best results, place food evenly on the plate. You can do this in several ways:

- If you are cooking several items of the same food, such as baked potatoes, place them in a ring pattern for uniform cooking.
- When cooking foods of uneven shapes or thickness, such as chicken breasts, place the smaller or thinner area of the food towards the center of the dish where it will be heated last.
- Layer thin slices of meat on top of each other.
- When you cook or reheat whole fish, score the skin – this prevents cracking. Shield the tail and head of whole fish with small pieces of foil to prevent overcooking. When using foil, make sure it doesn't touch the sides of the oven.
- Do not let food or a container touch the top or sides of the oven. This will prevent possible arcing.

Using aluminum foil

Metal containers should not be used in a microwave oven. There are, however, some exceptions. If you have purchased food which is prepackaged in an aluminum foil container, then refer to the instructions on the package. When using aluminum foil containers, cooking times may be longer because microwaves will only penetrate the top of the food.

If you use aluminum containers without package instructions, follow these guidelines:

- Place the container in a glass bowl and add some water so that it covers the bottom of the container, not more than ¼ inch high. This ensures even heating of the container bottom.
- Always remove the lid to avoid damage to the oven.
- Use only undamaged containers.
- Do not use containers taller than ¾ inch.
- Container must be half filled.
- To avoid arcing, there must be a minimum ¼ inch between the aluminum container and the walls of the oven and also between two aluminum containers.
- Always place the container on the turntable.
- Reheating food in aluminum foil containers usually takes up to double the time compared to reheating in plastic, glass, china, or paper containers. The time when food is ready will vary depending upon the type of container you use.
- Let food stand for 2-3 minutes after heating so that heat is spread evenly throughout container.

Cooking you should not do in your microwave oven

- **Do not** do canning of foods in the oven. Closed glass jars may explode, resulting in damage to the oven or possible personal injury.
- Do not use the microwave oven to sterilize objects (baby bottles, etc.). It is difficult to keep the oven at the high temperature needed for safe sterilization.

QUESTIONS AND ANSWERS

QUESTIONS	ANSWERS
Can I operate my microwave oven without the turntable or turn the turntable over to hold a large dish?	No. If you remove or turn over the turntable, you will get poor cooking results. Dishes used in your oven must fit on the turntable.
Can I use a rack in my microwave oven so that I may reheat or cook on two levels at a time?	You can use a rack only if the rack is supplied with your microwave oven. If you use a rack not supplied with the microwave oven, you can get poor cooking performance and/or arcing.
Can I use either metal or aluminum pans in my microwave oven?	You can use aluminum foil for shielding (use small, flat pieces), small skewers, and shallow foil trays (if tray is not taller than ¾ inch deep and half filled with food to absorb microwave energy). Never allow metal to touch walls or door. (For more information, see "Using aluminum foil" in the "Microwave cooking tips" section.
Is it normal for the turntable to turn in either direction?	Yes. The turntable rotates clockwise or counter- clockwise, depending on the rotation of the motor when the cooking cycle begins.
Sometimes the door of my microwave oven appears wavy. Is this normal?	This appearance is normal and does not affect the operation of your oven.
What are the humming noises that I hear when my microwave oven is operating?	You hear the sound of the transformer when the magnetron tube cycles on.
Why does the dish become hot when I microwave food in it? I thought that this should not happen.	As the food becomes hot it will conduct the heat to the dish. Be prepared to use hot pads to remove food after cooking.
What does "standing time" mean?	"Standing time" means that food should be removed from the oven and covered for additional time to allow it to finish cooking. This frees the oven for other cooking.
Why does steam come out of the air exhaust vent?	Steam is normally produced during cooking. The microwave oven has been designed to vent this steam out the rear vents.
Can I pop popcorn in my microwave oven? How do I get the best results?	Yes. Pop packaged microwave popcom following manufacturer's guidelines or use the preset Popcorn pad. Do not use regular paper bags. Use the "listening test" by stopping the oven as soon as the popping slows to a "pop" every one or two seconds. Do not repop unpopped kernels. Do not pop popcorn in glass utensils.

TROUBLESHOOTING

Most cooking problems often are caused by little things you can find and fix without tools of any kind. Check the lists below and on the next page before calling for assistance or service. If you still need help, see the "Requesting Assistance or Service" section.

MICROWAVE OVEN DOES NOT WORK

PROBLEM	CAUSE
Nothing works.	 The power supply cord is not plugged into a live circuit with the proper voltage. (See the "Electrical requirements" in the "Installation Instructions" section and "Electrical connection" in the "Getting to Know" section.)
	 A household fuse has blown or a circuit breaker has tripped.
	 The electric company has had a power failure.
The microwave oven will not run.	 You are using the oven as a timer. Touch the off/cancel pad to cancel the minute timer.
	 The door is not firmly closed and latched.
	 You did not touch the start/enter pad.
	● You did not follow directions exactly.
	 An operation that you set earlier is still running. Touch the off/cancel pad to cancel that operation.

COOKING TIMES

PROBLEM	CAUSE	
Microwave cooking times seem too long.	 The electric supply to your home or wall outlets is low or lower than normal. Your electric company can tell you if the line voltage is low. Your electrician or service technician can tell you if the outlet voltage is low. 	
	 The cook power is not at the recommended setting. Check the "Microwave cooking chart" section. 	
	 You have not allowed enough cooking time for the amount of food being cooked. Larger amounts of food need longer cooking times. 	
The display shows a time counting down but the oven is not cooking.	 You have set the controls as a minute timer. Touch the off/cancel pad to cancel the minute timer. 	

TURNTABLE

PROBLEM	CAUSE
The turntable will not turn.	 The turntable is not correctly in place. It should be correct-side up and sitting firmly on the center shaft.
	 The support is not operating correctly. Remove the turntable and restart the oven. If the support still does not move, call an authorized Whirlpool service technician for repair. Cooking without the turntable can give you poor results.

TONES

PROBLEM	CAUSE	
You do not hear the	You have not entered the correct command.	
programming or end- of-cycle tone.	 You have turned off the tone. See "Audible signals" in the "Control panel features" section. 	

FAN PROBLEMS

PROBLEM	CAUSE
The fan seems to be running slower than usual.	 The oven has been stored in a cold area. The fan will run slower until the oven warms up to normal room temperature.

DISPLAY MESSAGES

PROBLEM	CAUSE	
The display is flashing "88:88."	 There has been a power interruption. Reset the clock. (See "Setting the clock" in the "Getting to Know" section.) 	

If none of these items are causing your problem, see the "Requesting Assistance or Service" section.

REQUESTING ASSISTANCE OR SERVICE

To avoid unnecessary service calls, please check the "Troubleshooting" section. It may save you the cost of a service call. If you still need help, follow the instructions below.

IF YOU NEED ASSISTANCE OR SERVICE

Call the Whirlpool Consumer Assistance

o as

Center toll free at 1-800-253-1301. Our consultants are available to assist you.

When calling:

Please know the purchase date, and the complete model and serial number of your appliance (see the "A Note to You" section). This information will help us better respond to your request.

Our consultants provide assistance with:

- Features and specifications on our full line of appliances
- Installation information
- Use and maintenance procedures

- Accessory and repair parts sales
- Do-it-yourself repair help
- Specialized customer assistance (Spanish speaking, hearing impaired, limited vision, etc.)
- Referrals to local dealers, service companies, and repair parts distributors

Whirlpool service technicians are trained to fulfill the product warranty and provide after-warranty service, anywhere in the United States.

To locate the authorized Whirlpool service company in your area, you can also look in your telephone directory Yellow Pages.

IF YOU NEED REPLACEMENT PARTS

If you need to order replacement parts, we recommend that you only use FSP® factory authorized parts. FSP replacement parts will fit right and work right, because they are made to the same exacting specifications used to build every new WHIRLPOOL® appliance.

To locate FSP replacement parts in your area, call our Consumer Assistance Center telephone number or your nearest authorized service center.

FOR FURTHER ASSISTANCE

If you need further assistance, you can write to Whirlpool with any questions or concerns at:

Whirlpool Brand Home Appliances Consumer Assistance Center c/o Correspondence Dept. 2000 North M-63 Benton Harbor, MI 49022-2692

Please include a daytime phone number in your correspondence.

If the dealer, authorized servicer, and Whirlpool have failed to resolve your problem, you can contact the Major Appliance Consumer Action Program (MACAP). MACAP is a group of independent consumer experts that voice consumer views at the highest levels of the major appliance industry. MACAP will in turn inform us of your action.

Major Appliance Consumer Action Program 20 North Wacker Drive Chicago, IL 60606

WARRANTY WHIRLPOOL® MICROWAVE OVEN

LENGTH OF WARRANTY	WHIRLPOOL WILL PAY FOR FSP® replacement parts and repair labor to correct defects in materials or workmanship. Service must be provided by an authorized Whirlpool service company.	
FULL ONE-YEAR WARRANTY FROM DATE OF PURCHASE		
LIMITED FOUR-YEAR WARRANTY SECOND THROUGH FIFTH YEAR FROM DATE OF PURCHASE	FSP replacement magnetron tube on microwave ovens if defective in materials or workmanship.	

WHIRLPOOL WILL NOT PAY FOR

A. Service calls to:

- 1. Correct the installation of your microwave oven.
- 2. Instruct you how to use your microwave oven.
- 3. Replace house fuses or correct house wiring.
- 4. Replace owner-accessible light bulbs.
- B. Repairs when your microwave oven is used in other than normal, single-family household use.
- **C.** In-home service. Your microwave oven must be taken to an authorized Whirlpool service company, except when your microwave oven is installed over an approved Whirlpool oven using an approved built-in kit. (See the "Built-In kits" section for a list of approved built-in kits.)
- **D.** Damage to your microwave oven caused by accident, misuse, fire, flood, acts of God, or use of products not approved by Whirlpool.
- E. Any labor costs during limited warranty.
- F. Repairs to parts or systems caused by unauthorized modifications made to the appliance.

3/96

WHIRLPOOL CORPORATION SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion or limitation may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Outside the United States, a different warranty may apply. For details, please contact your authorized Whirlpool dealer.

If you need service, first see the "Troubleshooting" section of this book. After checking "Troubleshooting," additional help can be found by checking the "Requesting Assistance or Service" section or by calling our Consumer Assistance Center telephone number, 1-800-253-1301, from anywhere in the U.S.A.
