IMPORTANT SAFETY INSTRUCTIONS

Please read all safety instructions before using your new Electrolux cooktop.

△ WARNING

To reduce the risk of fire, electrical shock, or injury when using your gas cooktop, follow basic precautions including the following:

AWARNING

If the information in this manual is not followed exactly, a fire or explosion may result causing property damage, personal injury or death.

FOR YOUR SAFETY:

- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- WHAT TO DO IF YOU SMELL GAS:
- Do not try to light any appliance.
- · Do not touch any electrical switch; do not use any phone in your building.
- Immediately call your gas supplier from a neighbor's phone. Follow the gas supplier's instructions.
- If you cannot reach your gas supplier, call the fire department.
- Installation and service must be performed by a qualified installer, servicer or the gas supplier.
- Remove all tape and packaging before using the Cooktop. Destroy the carton and plastic bags after unpacking the cooktop. Never allow children to play with packaging material. Do not remove the model/serial plate attached to the cooktop.
- Proper Installation-Be sure your appliance is properly installed and grounded by a qualified technician in accordance with the National Fuel Gas Code ANSI Z223.1—latest edition in the United States, or in Canada CAN/CGA B149.1, and CAN/CGA B149.2, and the National Electrical Code ANSI/NFPA No. 70—latest edition in United States, or in Canada CSA Standard C22.1, Canadian Electrical Code, Part 1, and local code requirements. Install and/or adjust only per installation instructions provided in the literature package for this cooktop.

Ask your dealer to recommend a qualified technician and an authorized repair service. Know how to shut off gas supply at the meter and disconnect the electrical power to the cooktop at the circuit breaker or fuse box in case of an emergency.

- User servicing—Do not repair or replace any part of the appliance unless specifically recommended in the manuals. All other servicing should be done only by a qualified technician, This may reduce the risk of personal injury and damage to the cooktop.
- Never modify or alter the construction of a cooktop by removing panels, wire covers or any other part of the product.

△ CAUTION

Do not store items of interest to children in the cabinets above the cooktop. Children climbing on the cooktop to reach items could be seriously injured.

Safety

- Stepping, leaning or sitting on this cooktop can result in serious injuries and also cause damage to the cooktop. Do not allow children to climb or play around the cooktop.

- Storage on Appliance—Flammable materials should not be stored on the cooktop or near Storage on Appliance—Flammable materials should not be stored on the cooktop or near and surface units. This includes paper, plastic and cloth items, such as cookbooks, plasticware and surface units. This includes paper, plastic and cloth items, such as aerosol one on or near toward as well as flammable liquide. Do not store evolutions as well as flammable liquide. surace units. This includes paper, plastic and cloth tiems, such as aerosol cans, on or near towels, as well as flammable liquids. Do not store explosives, such as aerosol cans, on or near the section.

towers, as were as naminable inquires. Do not store explosives, such as acrosor caris, convers, as were as naminable inquires, by not store explosives, such as acrosor caris, convers, as were as naminable materials may explode and result in fire or property damage.

- Do Not Leave Children Alone—Children should not be left alone or unattended in the area where anniance is in use. They should never be allowed to sit or stand on any nart of the anniance is in use. DO NOTLEAVE CHITCHEN MORE—CHITCHEN SHOULD HOVE BE Allowed to sit of stand on any part of the appliance.

 Appliance is in use. They should never be allowed to sit of stand on any part of the appliance.
- DONOTTOUCH SURFACE BURNERS/UNIT, GRATES OR AREAS NEAR THESE BURNERS/UNIT.

 - or let Gouling or other framinable materials touch these areas unin they have cook. Among these areas are the cooktop and surfaces facing the cooktop. • Wear Proper Apparel—Loose-fitting or hanging garments should never be worn while using the
 - wear rroper apparer—Loose-many or nanging garments shown in ever be worn very surfaces.

 appliance. Do not let clothing or other flammable materials contact hot surfaces. Do Not Use Water or Flour on Grease Fires—Smother the fire with a pan lid, or use baking soda,
 a dru chemical or foam tune avtinguisher
 - When heating fat or grease, watch it closely. Fat or grease may catch fire if allowed to become too hot.
 - Use Only Dry Potholders—Moist or damp potholders on hot surfaces may result in burns from
 - tuse unity any remorders—moist or damp periorders on not surraces may result in during from steam. Do not let potholders touch hot heating elements, the flame or burners. Do not use a towel or other hullow cloth instead of a notholder Do Not Heat Unopened Food Containers—Buildup of pressure may cause container to burst and regular in injury.

 - IMPORTANT SAFETY INSTRUCTIONS FOR USING YOUR COOKTOP

Use Proper Flame Size—Adjust flame size so it does not extend beyond the edge of the utensil. The use of undersized utensils will expose a portion of the burner flame to direct contact and may result in ignition of clothing.

Despared a transil state of the position of the purpose of the

- Know which knob controls each surface burner/surface unit. Place a pan of food on the burner here the pan and turn the humar off before removing the pan.

 I and turn the humar off before removing the pan. Proper relationship of utensil to flame will also improve efficiency.
- Always turn knob to the full LITE position when igniting top burners. Visually check that burner has
 If Then adjust the flame so it does not extend howard the edge of the utencil
 - Miways will know to the flame so it does not extend beyond the edge of the utensil. oner name ize. This cooktob can be equipped with one or more surface units of different sizes.

To the surface heating unit to direct contact and may result

- Utensil Handles Should Be Turned Inward and Not Extend Over Adjacent Surface Burners/Unit —To reduce the risk of burns, ignition of flammable materials, and spillage due to unintentional contact with the utensil, the handle of the utensil should be positioned so that it is turned inward, and does not extend over adjacent surface burners.
- Never Leave Surface Burners/Unit Unattended at High Heat Settings—Boilovers cause smoking and greasy spillovers that may ignite, or a pan that has boiled dry may melt.
- Protective Liners—Do not use aluminum foil to line any part of the cooktop, use aluminum foil only to cover food during cooking. Improper installation of these liners may result in risk of electric shock, or fire.
- Glazed Cooking Utensils—Only certain types of glass, glass/ceramic, ceramic, earthenware, or other glazed utensils are suitable for cooktop service without breaking due to the sudden change in temperature. Check the manufacturer's recommendations for cooktop use.
- Do not use Searing Grill on the cooktop. The Searing Grill is not designed for use on the cooktop.
 Doing so may result in a fire.

企WARNING

Do Not Use Stove Top Grills on Your Sealed Gas Burners—If you use a stove top grill on a sealed gas burner, it will cause incomplete combustion and can result in exposure to carbon monoxide levels above allowable current standards. This can be hazardous to your health.

Do Not Use Decorative Surface Burner/Unit Covers. If a burner/unit is accidentally turned on, the decorative cover will become hot and possibly melt. You will not be able to see that the burner/unit is on. Burns will occur if the hot covers are touched. Damage may also be done to the cooktop or burners/unit because the covers may cause overheating. Air will blocked from the burner/unit and cause combustion problems.

IMPORTANT INSTRUCTIONS FOR USING YOUR GLASS COOKTOP

- Do Not Operate or Clean a Broken Cooktop Glass.—If glass top should break, cleaning solutions and spillovers may penetrate the broken cooktop and create a risk of electric shock. Contact a qualified technician immediately.
- Clean Cooktop Glass with Caution.—If a wet sponge or cloth is used to wipe spills on a hot cooking
 area, be careful to avoid a steam burn. Some cleaners can produce harmful fumes if applied to a
 hot surface.
- Avoid Scratching the Cooktop Glass with Sharp Objects.

IMPORTANT SAFETY NOTICE

The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the state to cause cancer, birth defects or other reproductive harm, and requires businesses to warn customers of potential exposure to such substances.

NOTE

Save these important safety instructions for future reference.

GROUNDING INSTRUCTIONS

For personal safety, the cooktop must be properly grounded. For maximum safety, the power cord must be plugged into an electrical outlet that is correctly polarized and properly grounded.

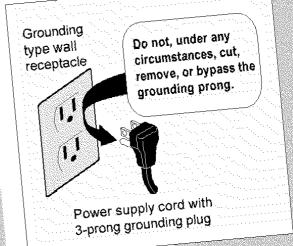

DO NOT operate the cooktop using a 2-prong adapter or an extension cord. If a 2-prong wall receptacle is the only available outlet, it is the personal responsibility of the consumer to have it replaced with a properly grounded 3-prong wall receptacle installed

See the INSTALLATION INSTRUCTIONS packaged with this by a qualified electrician. cooktop for complete installation and grounding instructions.

AWARNING

This appliance is equipped with a 3-prong grounding plug for your protection against shock hazard and should be plugged directly into a properly grounded receptacle. DO NOT cut or remove the grounding prong from this plug.

Avoid fire hazard or electrical shock. DO NOT use an adapter plug, an extension cord, or remove grounding prong from electrical power cord. Failure to follow this warning can cause serious injury, fire or death.

LIQUEFIED PETROLEUM (PROPANE) GAS CONVERSION

This appliance can be used with Natural Gas and Propane Gas. It is shipped from the

A kit for converting to LP gas is supplied with your cooktop. The kit is marked "FOR LP/ PROPANE GAS CONVERSION". Follow the installation instructions which are inside the

The conversion must be performed by a qualified service technician in accordance with the kit instructions and all local codes and requirements. Failure to follow instructions could result in serious injury or property damage. The qualified agency performing this work assumes responsibility for the conversion.

Severe shock, or damage to the cooktop may occur if the cooktop is not installed by a qualified installer or electrician.

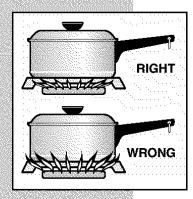

Any additions, changes or conversions required in order for this appliance to satisfactorily meet the application needs must be made by a qualified service technician in accordance with the manufacturer's instructions and all

Surface Cooking

FLAME SIZE

For most cooking, start on the highest control setting and then turn to a lower one to complete the process. Use the chart below as a guide for determining proper flame size for various types of cooking. The size and type of utensil used and the amount of food being cooked will influence the setting needed for cooking.

For deep fat frying, use a thermometer and adjust the surface control knob accordingly. If the fat is too cool, the food will absorb the fat and be greasy. If the fat is too hot, the food will brown so quickly that the center will be undercooked. Do not attempt to deep fat fry too much food at once as the food will neither brown nor cook properly.

*Flame Size High Flame Medium Flame

Low Flame

Type of Cooking

Start most foods; bring water to a boil; pan broiling Maintain a slow boil; thicken sauces, gravies; steam Keep foods cooking; poach; stew

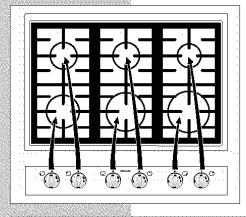

*These settings are based on using medium-weight aluminum pans with lids. Settings may vary when using other types of pans.

Never extend the flame beyond the outer edge of the utensil. A higher flame simply wastes heat and energy, and increases your risk of being burned by the flame.

PROPER BURNER ADJUSTMENTS

The color of the flame is the key to proper burner adjustment. A good flame is clear, blue and hardly visible in a well-lighted room. Each cone of flame should be steady and sharply defined. Adjust or clean burner if flame is yellow-orange. To clean burner, see instructions under **General Care & Cleaning**.

LOCATIONS OF THE BURNERS

Your cooktop is equipped with 5 different sized burners.

The surface burners are located on the cooktop as follows (See Figure):

- a 5 000 BTU (natural gas) burner located at the right rear position;
- two 9 500 BTU (natural gas) burners located at the left and center rear positions;
- a 12 000 BTU (natural gas) burner located at the left front position;
- a 14 000 BTU (natural gas) burner located at the center front position;
- and a 17 000 BTU (natural gas) burner located at the right front position.

PLACEMENT OF BURNER HEADS AND CAPS

Place burner head over each gas orifice, matching the head with the orifice size. Be careful not to damage the electrode fits correctly into slot in the head over the orifice. Make sure electrode fits correctly into slot in the head over the orifice. Make sure electrode fits correctly into slot in the head over the orifice. Make sure electrode fits correctly into slot in the head, matching the cap the head burner head, matching the ring the head over the orifice and on each burner has an inner locating ring burner head. Place a burner cap for each burner head. Be sure that all the size to the head size. The cap for each burner head. BEFORE using your which centers the cap correctly on the burner date and burner heads are correctly placed BEFORE using your burner caps and burner heads are correctly placed.

appliance.

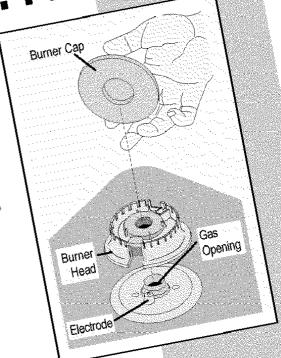

Make sure each burner cap is properly aligned and level.

Make sure each burner cap is properly aligned and level.

Turn the burner on to determine if it will light. If the burner yourself.

Turn the burner on to determine if it will light. If the burner yourself.

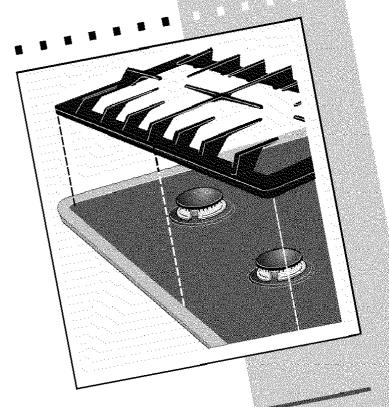

To not service the sealed burner yourself.

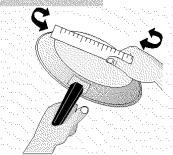

PLACEMENT OF BURNER GRATES

Place grates on the Ceramic Glass Cooktop. Be sure they are right located inside the stainless steel frame.

ATTENTION: Do not slide the grates on the stainless steel frame, doing so can damage the surface.

SURFACE COOKING UTENSILS

Pans should have flat bottoms. Check for flatness by rotating a ruler across the bottom. There should be no gaps between the pan and ruler.

* Specialty pans such as lobster pots, griddles and pressure cookers may be used but must conform to the above recommended cookware requirements.

*GOOD

- · Flat bottom and straight sides.
- Tight fitting lids.
- · Weight of handle does not tilt pan. Pan is well balanced.
- · Pan sizes match the amount of food to be prepared and the size of burner.
- Made of material that conducts heat well.
- · Easy to clean.

POOR

· Curved and warped pan bottoms.

· Pan overhangs unit by more than 2.5 cm (1").

Heavy handle tilts pan.

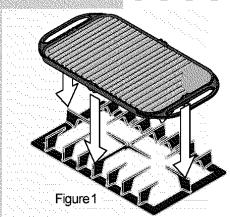

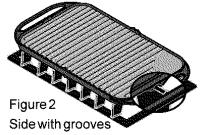

Flame extends beyond unit.

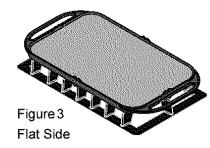

Note: Always use a utensil for its intended purpose. Follow manufacturer's instructions. Some utensils were not made to be used in the oven or on the cooktop.

USING THE GRIDDLE

The griddle is intended for direct food cooking and can be used on both sides (Figures 2 and 3). Do not use pans or other cookware on the griddle. Doing so could damage the finish. With the grate in position over the burner, set the griddle on top of the grate positioning the notches in the griddle over the grate fingers (Figures 1 and 2).

A CAUTION

Always place the griddle on the grate before to turn on the burner.

Always use potholders to remove the griddle from the grate. Allow the griddle to cool before removing. Do not set hot griddle on surfaces that cannot withstand high heat; such as countertops.

Be sure the griddle is positioned correctly and stable before use to prevent hot spills and possible burns.

USING THE WOK STAND

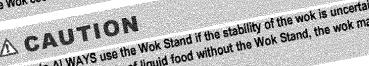

The Wok Stand provided with your cooktop is designed to allow round-bottomed woks to be The YVOK Stand provided with your cooktop is designed to allow round-bottomed woks to be used. It is recommended that you use a 14 inch diameter (35.5 cm) or less Wok. It is recommended that you use a 14 inch diameter with the work stand for host recommended that you use a horizon burner with the work stand for host recommended that you use a the right front powers. usea. It is recommended that you use the right front POWER burner with the work stand for best recommended that you use the hymenonic rover burner with the work stand to performance. If properly positioned, the Work Stand will not slide off the grate.

Always use potholders to remove the wok stand from the grate. Allow the wok stand to cool before removing. Do not set hot wok stand on surfaces that cannot withstand high heat; such as countertops. Be sure the Wok Stand is positioned correctly and stable before use to prevent hot spills and

With the grate in position over the burner, set the Wok Stand on top of the To Properly Position the Wok Stand: grate positioning the notches in the Wok Stand over the cooktop grate fingers (See Figure 1).

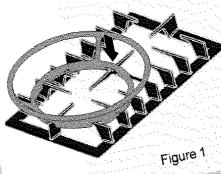

The Wok cooking performance is best on the right front POWER burner position. NOTE

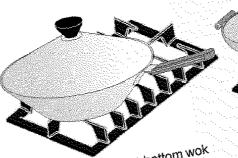

Be sure to ALWAYS use the Wok Stand if the stability of the wok is uncertain. If cooking large amounts of liquid food without the Wok Stand, the wok may tip and spill over causing burns.

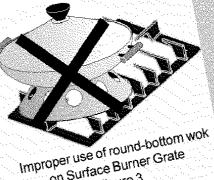

Flat-bottom woks with large flat bottoms may also be used on your cooktop Surface Burner Grates without the Wok Stand (See Figure 2). Insure the stability of the flatbottom wok before cooking without the Wok Stand. If unstable, DO NOT use the flat-bottom wok without the Wok Stand.

Round-bottom woks (with a support ring) should NOT be used (See Figure 3). The supporting ring was not designed for proper or The Gurface Burner

Proper use of flat-bottom wok on Surface Burner Grate Figure 2

on Surface Burner Grate Figure 3

USING THE SIMMER PLATE

The simmer plate (Figure 1) is intended to diffuse lower temperature of the burner to help cooking delicate aliment such as chocolate, milk, bechamel, etc... It can also be use for cooking sauce during long period. With the grate in position over the burner, set the simmer plate on top of the grate positioning the notches in the simmer plate over the grate fingers (See Figure 2) and then place the utensil on the simmer plate.

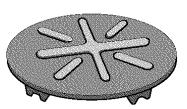

Figure 1

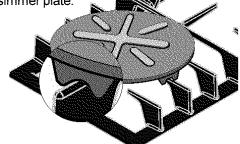

Figure 2

A CAUTION

Always place the simmer plate on the grate before to turn on the burner.

Always use potholders to remove the simmer plate from the grate. Allow the simmer plate to cool before removing. Do not set hot simmer plate on surfaces that cannot withstand high heat; such as countertops.

Be sure the simmer plate is positioned correctly and stable before use to prevent hot spills and possible burns.

SETTING SURFACE CONTROLS

Your cooktop may be equipped with any combination of the following burners:

Simmer Burner: best used for simmering delicate sauces, etc.

Large Burner: best used when bringing large quantities of liquid to temperature and when Standard Burner: used for most all surface cooking needs.

Regardless of size, always select a utensil that is suitable for the amount and type of food heing prepared. Salent a himper and flame size appropriate to the pan. Never allow flames to heing prepared. Regardless of size, always select a utensil that is suitable for the amount and type of food being prepared. Select a burner and flame size appropriate to the pan. Never allow flames to being prepared. Select a burner and flame size appropriate to the pan. preparing larger quantities of food.

Your cooktop is also equipped with 270° rotation flame control valves. These valves provide

Tour cookiop is also equipped with 270 rotation name control valves. I nese valves provienhanced control of the burner flame. Each burner lights automatically from an electric enhanced control of the burner flame. extend beyond the outer edge of the pan. ignitor when its control knob is turned to the LITE position.

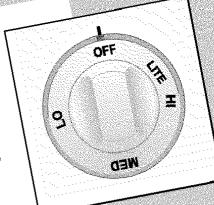

Do not place plastic items such as salt and pepper shakers, spoon holders or plastic wrappings on the salt the salt and pepper shakers, spoon holders or plastic wrappings on the salt the salt and pepper shakers, spoon holders or plastic wrappings on the salt the s top of the cooktop when it is in use. These items could melt or ignite. Potholders, towels or wood spoons could catch fire if placed too close to aflame.

To operate the surface burner:

- 1. Place cooking utensil on purner.
 2. Push in and turn the Surface Control knob to LITE. Note: All electronic ignitors will click at the same time. However, only the burner you are turning
 - 4. Turn the control knob to the desired flame size. The control knobs do not have to be set at a particular mark. Use the guides and adjust the flame as 3. Visually check that the burner has lit. nave to be set at a particular mark, use the guides and adjust the name as needed. **DO NOT** cook with the Surface Control knob in the **LITE** position.

(The electronic ignitor will continue to click if left in the LITE position,

In the event of an electrical power outage, the surface burners can be lit manually. To light a surface burner, hold a lit match to the burner head, then slowly turn the Surface Control knob to LITE. Use caution when lighting surface burners manually.

CARE & CLEANING TABLE

Surfaces	How to Clean
Painted and Plastic Control Knobs	For general cleaning, use hot, soapy water and a cloth. For more difficult soils and built-up grease, apply a liquid detergent directly onto the soil. Leave on soil for 30 to 60 minutes. Rinse with a damp cloth and dry. DO NOT use abrasive cleaners on any of these materials; they can scratch.
Glass Surface	Before cleaning, turn all controls to OFF. Clean the glass as instructed in General Care & Cleaning section under Cooktop Cleaning and Maintenance.
Porcelain Enamel Burner Grates, Burner Caps, Griddle, Simmer Plate, Wok Stand	Clean burner grates in the dishwasher and dry upon removal. If soils are not removed, follow the cooktop cleaning instructions below. Gentle scouring with a soapy scouring pad will remove most spots. Rinse with a 1:1 solution of clean water and ammonia. <i>If necessary</i> , cover difficult spots with an ammonia-soaked paper towel for 30 to 40 minutes. Rinse with clean water and a damp cloth, then scrub with a soap-filled scouring pad. Rinse and wipe dry with a clean cloth. Remove all cleaners or the porcelain may become damaged during future heating. DO NOT use spray oven cleaners on the cooktop.
Surface Burners Burner Head	The holes in the burners of your cooktop must be kept clean at all times for proper ignition and a complete, even flame. Clean the burner holes routinely with a small gauge wire or needle and especially after bad spillovers which could clog these holes. To remove, clean and replace sealed burner units; follow the instructions in General Care & Cleaning section under Cleaning the Burner Grates , Burner Caps , Burner Heads . For stubborn stains, scrub with soap and water or a mild abrasive cleanser and damp cloth. Dry the burners thoroughly in a warm oven for 30 minutes. Then replace them, making sure they are seated and level. DO NOT put burner units in the dishwasher.
Stainless Steel, Control Panel, Decorative Trim,	Clean stainless steel with hot, soapy water and a dishcloth. Rinse with clean water and a cloth. Do not use cleaners with high concentrations of chlorides or chlorines. Do not use harsh scrubbing cleaners. Only use kitchen cleaners that are especially made for cleaning stainless steel. Always be sure to rinse the cleaners from the surface as bluish stains may occur during heating that cannot be removed.

Burner

Head

Figure 1

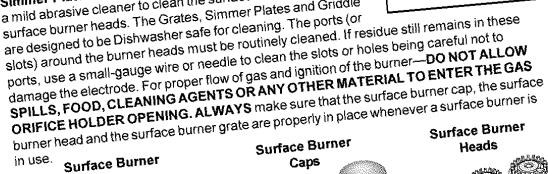

CLEANING THE BURNER GRATES, BURNER CAPS, BURNER HEADS, SIMMER PLATE AND GRIDDLE

The Burner Grates, Burner Caps, Burner Heads, simmer plate and griddle should be routinely cleaned. Keeping the burner ports clean will prevent improper ignition and an uneven flame. Refer to the following instructions:

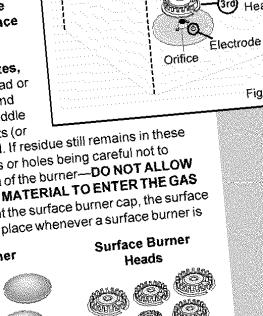

To Remove and Replace the Surface Burner Grate, Surface Burner Cap and Surface Burner Head - Remove in the following order; (1st) Surface Burner Grate, (2nd) Surface Burner Cap, (3rd) Surface Burner Head (See Figure 1).

Reverse the procedure above to replace the Surface Burner Cap, Surface Burner Head and Surface Burner Grate. Do not remove any burner parts from the cooktop until the burner parts have completely cooled and are safe to handle. Do not operate the surface burners without the Surface Burner Caps, Surface Burner Heads and Surface Burner Grates properly in place.

To Clean the Burner Caps, Burner Heads, Burner Grates, Simmer Plate and Gridlle - Use a soap-filled scouring pad or a mild abrasive cleaner to clean the surface burner caps and surface burner heads. The Grates, Simmer Plates and Griddle

Caps

(1st)

THE COOKTOP IS NOT REMOVABLE. Do not attempt to remove or lift the cooktop.

Grate

- Use caution when replacing the burner head so the electrode is not damaged. A damaged electrode may cause a delayed ignition or prevent the burner from igniting versions required in order for this appliance to perform

COOKTOP CLEANING AND MAINTENANCE

Consistent and proper cleaning is essential to maintaining your ceramic glass cooktop

Prior to using your cooktop for the first time, apply the recommended Cleaning Creme to the ceramic surface. A sample of that cleaning creme is supplied with your appliance and you will find it in store. Clean and buff with a paper towel. This will make cleaning easier when soiled from cooking. The special cooktop cleaning cream leaves a protective finish on the glass to help prevent scratches and abrasions.

Sliding aluminum or copper clad bottom pans on the cooktop glass can cause metal markings on the cooktop surface. These marks should be removed **immediately** after the cooktop has cooled using the cooktop cleaning cream. Metal marks can become permanent if not removed prior to future use.

Cookware (cast iron, metal, ceramic or glass) with rough bottoms can mark or scratch the cooktop surface. **Do not slide anything metal or glass** across the cooktop. **Do not** use your cooktop as a cutting board or work surface in the kitchen. **Do not** cook foods directly on the cooktop surface without a pan. **Do not** drop heavy or hard objects on the glass cooktop, they may cause it to crack.

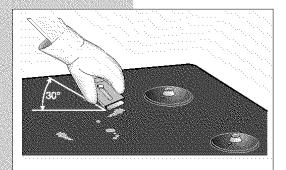

CLEANING RECOMMENDATIONS FOR THE CERAMIC GLASS COOKTOP

A CAUTION

Before cleaning the cooktop, be sure the controls are turned to OFF and the cooktop is COOL.

△WARNING

DO NOT use a cooktop cleaner on a hot cooktop. The fumes can be hazardous to your health, and can chemically damage the ceramic-glass surface.

For light to moderate soil:

Apply a few drops of Cleaning Creme directly to the cooktop. Use a paper towel to clean the entire cooktop surface. Make sure the cooktop is cleaned thoroughly, leaving no residue. Do not use the towel you use to clean the cooktop for any other purpose.

For heavy, burned on soil:

First, clean the surface as described above. Then, if soils remain, protect your hand with a potholder and carefully scrape soils with a metal razor blade scraper, holding scraper at a 30 degree angle to the surface. Remove loosened soils with cooktop cleaning cream and buff surface clean.

CLEANING RECOMMENDATIONS FOR THE CERAMIC GLASS

COOKTOP (CONTINUED)

Damage to the ceramic glass cooktop may occur if you use scrub pad. A CAUTION

These types of soils need be removed immediately if spilled or melted onto the ceramic cooktop curface.

These types of soils need be removed immediately if spilled or melted onto the ceramic cooktop curface) may occur if not removed immediately if spilled or melted onto the ceramic cooktop curface) may occur if not removed immediately if spilled or melted onto the ceramic cooktop. These types of suits need be removed immediately if spilled of melled onto the ceramic cooklop surface) may occur if not removed surface. Permanent damage (such as pitting of the cooklop surface) may occur if not removed surface. Permanent damage (such as pitting of the cooklop surface) may occur if not removed surface. sundce. Permanent usundge (such as pilling of the cooktop surface) may occur if not removed immediately. After turning the surface elements OFF, use a razor blade scraper of a metal enable with a mit and corane the soil from the hot curfoce (so illustrated on around the soil from the hot curfoce). Plastic or foods with a high sugar content: Immediatery. After turning the surface elements Urr, use a razor place scraper or a metal spatula with a mitt and scrape the soil from the hot surface (as illustrated on previous page).

Allow the control to control and the the same method for heavy or human or each Sparula will a mill and scrape the same method for heavy or burned on soils.

Allow the cooktop to cool, and use the same method for heavy.

Do not use the following on the ceramic glass cooktop:

- Do not use abrasive cleaners and scouring pads, such as metal and some nylon pads. They may scratch the cooktop, making it more difficult to clean.
 - Do not use harsh cleaners, such as chlorine bleach, ammonia or oven cleaners, as they may etch or discolor the cooktop.
 - Do not use dirty sponges, cloths or paper towels, as they can leave soil or lint on the cooktop which can burn and cause

Special Gaution for Aluminum Foil and Aluminum Cooking Utensis

• Aluminum foil - Use of aluminum foil will damage the cooktop. Do not use thin aluminum foil will damage the cooktop under ANY aircumstance. Special Caution for Aluminum Foil and Aluminum Cooking Utensils

- Cooking utensils or allow foil to touch the ceramic cooktop under ANY circumstances. COOKING UTENSIIS OF AllOW FULL TO LOUGH THE CETATRIC COUKIND UTILIZE ANY COICUMSTATIVES.

 Aluminum utensils - The melting point of aluminum is much lower than that of other metals.

 Care must be taken when aluminum note or nane are used on the cookton. If allowed to hall
- Care must be taken when aluminum pots or pans are used on the cooktop. If allowed to boil dry not only will the intensil be destroyed but it may fine to brook or mark the correct dry not only will the intensil be destroyed. dry, not only will the utensil be destroyed, but it may fuse to, break or mark the ceramic glass surface, permanently damaging the cooktop surface.

CARE AND CLEANING OF STAINLESS STEEL

Special care and cleaning are required for maintaining the appearance of stainless parts. Januare and Ocaning are required for maintaining the appearance of stantiess parts.

See refer to the table provided at the beginning of the General Care & Cleaning section

IMPORTANT

Before calling for service, review this list. It may save you both time and expense. This list includes common experiences that are not the result of defective workmanship or material in your cooktop.

SURFACE BURNERS DO NOT LIGHT

- Surface Control knob has not been completely turned to LITE. Push in and turn the Surface Control knob to LITE until burner ignites and then turn control knob to desired flame size.
- · Be sure gas supply valve is open.
- Burner ports are clogged. Clean burners. See Cleaning the Burner Grates, Burner Caps, Burner Heads in General Care & Cleaning section. With the burner off, clean ports with a small-gauge wire or needle.
- Power cord is disconnected from outlet (Electric Ignition Models only). Be sure cord is securely plugged into the outlet.
- Electrical power outage (electric ignition models only). Burners can be lit manually.
 See Setting Surface Controls in this Use and Care Guide.

BURNER FLAME ONLY LIGHTS HALF WAY AROUND BURNER

- Burner ports are clogged. With the burner off, clean ports by using a small-gauge wire or needle.
- Moisture is present after cleaning. Lightly fan the flame and allow burner to operate until flame is full. Dry the burners thoroughly following instructions in the General Cleaning section.

BURNER FLAME IS ORANGE

- Dust particles in main line. Allow the burner to operate a few minutes until flame turns blue.
- In coastal areas, a slightly orange flame is unavoidable due to salt air.

Solutions to Common Problems

SCRATCHES OR ABRASIONS ON CERAMIC GLASS COOKTOP SURFACE

- Coarse particles (such as salt or sand) are between cooktop and utensil. Be sure Cooktop surface and bottom of utensils are clean before use. Small scratches do not
 - Cleaning materials not recommended for glass ceramic cooktop have been used. See Ceramic-Glass Cooktop section in this Owner's Guide.

METAL MARKS ON CERAMIC GLASS COOKTOP SURFACE

Sliding or scraping of metal utensils on cooktop surface. Do not slide metal utensils on cooktop surface. Use a mildly abrasive cleanser to remove marks.

BROWN STREAKS AND SPECKS ON CERAMIC GLASS COOKTOP SURFACE

- Boilovers have cooked onto surface. Use razor blade scraper to remove soil. See
- Cleaning materials not recommended for ceramic-glass cooktop have been used. Use recommended cleaners and cleaning method. See Ceramic-Glass Cooktop section in

AREAS OF DISCOLORATION ON CERAMIC GLASS COOKTOP SURFACE

Mineral deposits from water and food. Wet surface with water and sprinkle on a willieral deposits from water and four, ever surface with water and sprinkle on cooktop cleaning creme. Scrub with a clean damp paper towel until the stain disappears. Wipe remaining paste away, then apply a small amount of cooktop cleaning creme and polish with a clean paper towel. Use cookware with clean, dry bottoms. See Ceramic-Glass Cooktop section in this Owner's Guide.

COOKTOP WARRANTY Your cooktop is protected by this warranty

In the U.S.A., your appliance is warranted by Electrolux Home Products North America, a division of White Consolidated Industries, Inc. We authorize no person to change or add to any of our obligations under this warranty. Our obligations for service and parts under this warranty must be performed by us or an authorized Electrolux Home Products North America servicer. In Canada, your appliance is warranted by Electrolux Canada Corp.

	WARRANTY PERIOD	THROUGH OUR AUTHORIZED SERVICERS,	THE CONSUMER WILL BE RESPONSIBLE FOR:
FULL ONE-YEAR WARRANTY		WE WILL: Pay all costs for repairing or replacing any parts of this appliance which prove to be defective in materials or workmanship.	Costs of service calls that are listed under NORMAL RESPONSIBILITIES OF THE CONSUMER. *

Costs of the technician's travel to the home and any costs for pick up and delivery of the appliance required because of service.

*NORMAL RESPONSIBILITIES OF THE CONSUMER

This warranty applies only to products in ordinary household use, and the consumer is responsible for the items listed below:

- 1. Proper use of the appliance in accordance with instructions provided with the product.
- Proper installation by an authorized servicer in accordance with instructions provided with the appliance and in accordance with all local plumbing, electrical and/or gas codes.
- Proper connection to a grounded power supply of sufficient voltage, replacement of blown fuses, repair of loose connections or defects in house wiring.
- 4. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves,etc., which are not a part of the appliance when it was shipped from the factory.
- 5. Damages to finish after installation.
- Replacement of light bulbs and/or fluorescent tubes (on models with these features).

This warranty does not cover the following:

- 1. CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN OR ANY IMPLIED WARRANTY.

 NOTE: Some states do not allow the exclusion or limitation of incidental or consequential damages, so this limitation or exclusion may not apply to you.
- Service calls which do not involve malfunction or defects in workmanship or material, or for appliances not in ordinary household use. The consumer shall pay for such service calls.
- 3. Damages caused by services performed by servicers other than Electrolux Home Products North America or its authorized servicers; use of parts other than genuine Electrolux Home Products parts; obtained from persons other than such servicers; or external causes such as abuse, misuse, inadequate power supply or costs of God.

4. Products with original serial numbers that have been removed or altered and cannot be readily determined. Keep your bill of sale, delivery slip, or some other appropriate payment record. The date on the bill establishes the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. This written warranty gives you specific legal rights. You may also have other rights that vary

from state to state. Service under this warranty must be obtained by contacting Electrolux Home Products:
