### COOKTOP

### **ELEMENT SIZE INDICATORS**

Some cooktop zone positions have up to 3 element sizes. You may use the single inner heating ring only or add 1 or 2 more rings with each press of the BURNER SIZE.

Number of circles = number of heating rings available.

- 1 circle = single element
- 2 circles = double element (some positions)
- 3 circles = triple element (left front position) (some positions)

### **SETTING the COOKTOP**

- If needed, wake the control panel.
- Touch the ON OFF key for desired heating zone.
- If heating zone has more than 1 ring size available, press and continue to press the BURNER SIZE for desired element size.
- Press the desired power level key (hi+, med, or lo-) or for more precise level settings use the hi+ or lo- keys to make specific level changes.

### LUXURY-GLIDE™ RACKS

### REMOVING GLIDE RACKS

### **A** CAUTION

Always use potholders or oven mitts when removing food or adjusting the oven racks. Wait until the oven has completely cooled if possible. Oven racks may be **HOT** and may cause burns.

Use thumbs to press in on both left and right spring-loaded release levers -Fig. 1-. Place the remainder of both hands over the upper front of the glide rack. While pressing in on both levers, pull the rack straight out slightly and release thumb levers. Using both hands grasp both the upper and lower portions of the glide rack (-Fig. 1); pull rack using both hands straight out until reaching the stop position -Fig 2-. At the stop, lift up front of rack slightly and continue to pull rack away from oven -Fig 3-. Be sure to hold on both upper and lower rack portions when removing from or handling rack outside of the oven - these rack portions move independently and are difficult to handle unless held together.

Grasp both upper and lower portions of glide rack, lift and place the rack resting evenly between the oven cavity walls. Tilt the front of the rack upward slightly and slide the rack completely into position. Some force may be necessary to make sure the oven rack has snapped completely back into place.
