

Whirlpool® Microwave Hood Combination

PRODUCT MODEL NUMBERS

MH3184XP
MH3185XP

Electrical: A 120-volt, 60 Hz, AC-only, 15 or 20 amp electrical supply located in the upper cabinet as close as possible to the microwave oven hood. A time-delay fuse or circuit breaker and separate circuit is recommended.

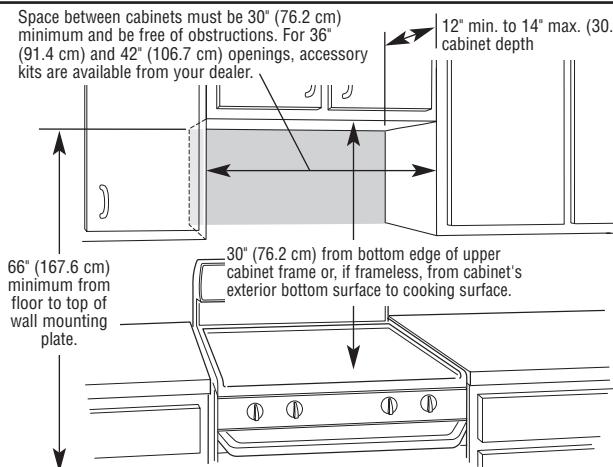

OVERALL DIMENSIONS

CABINET OPENING DIMENSIONS

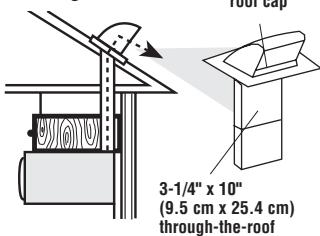

Space between cabinets must be 30" (76.2 cm) minimum and be free of obstructions. For 36" (91.4 cm) and 42" (106.7 cm) openings, accessory kits are available from your dealer.

NOTE: There must be at least one 2" x 4" (50.8 cm x 101.6 cm) wall stud and minimum 3/8" (9.5 mm) thickness drywall or plaster/lath within cabinet opening. Must be able to support 150 lbs. (68 kg).

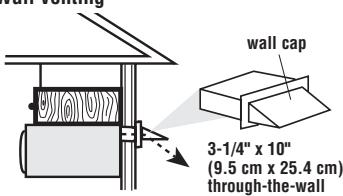

VENTING REQUIREMENTS

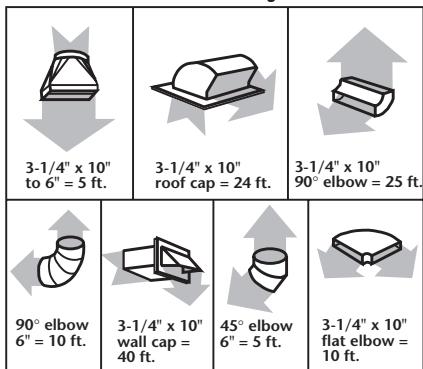

Roof venting

Wall venting

Recommended standard fittings

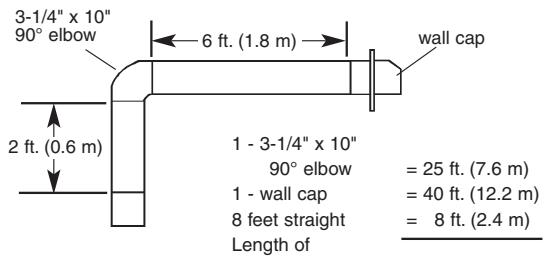

If the existing vent is round, a rectangular-to-round adapter must be used and a rectangular 3" (7.6 cm) extension vent between the damper assembly and the adapter must be installed to prevent sticking of the exhaust damper.

Recommended vent length

Use 3-1/4" x 10" (9.5 cm x 25.4 cm) rectangular or 6" (15.2 cm) round vent. The total length of the vent system including straight vent, elbow(s), transitions, wall or roof caps must not exceed the equivalent of 140 feet (42.7 m) of 3-1/4" x 10" (9.5 cm x 25.4 cm) rectangular or 6" (15.2 cm) round vent. For best performance, use no more than three 90° elbows. To calculate the length of system you need, add the equivalent feet for each vent piece used in the system. See examples below.

3-1/4" x 10" (9.5 cm x 25.4 cm) vent system

6" (15.2 cm) vent system
