## PRODUCT MODEL NUMBERS

JIM158XBR

Electrical: 115-volt, $60-\mathrm{Hz}$, AC-only, $15-\mathrm{amp}$ grounded circuit is required. A time-delay fuse or circuit breaker and separate circuit is recommended.
Water: A cold water supply using $1 / 4^{\prime \prime}(0.64 \mathrm{~cm})$ O.D. soft copper tubing with shutoff valve.

Drain: Either a gravity-drain system or condensate pump to carry water to an existing drain.

## CABINET OPENING DIMENSIONS

DRAIN REQUIREMENTS

## PRODUCT DIMENSIONS

Drain lines must have a minimum of $588^{\prime \prime}$ ( 15.88 mm ) inside diameter.
Drain lines must have a 1 " drop per 48 " ( 2.54 cm drop per 122 cm ) of run or $1 / 4$ " drop per 12" ( 6.35 mm per 30.48 cm ) of run and must not have low points where water can settle.
The floor drains must be large enough to accommodate drainage from all drains.
The ideal installation has a standpipe with a 1-1/2" $(3.81 \mathrm{~cm})$ to $2^{\prime \prime}(5.08 \mathrm{~cm})$ PVC drain reducer installed directly below the outlet of the drain tube as shown. You must maintain a 1" $(2.54 \mathrm{~cm})$ air gap between the drain hose and the standpipe.
It may be desirable to insulate the drain line thoroughly up to the drain inlet.

## A. Drain hose <br> B. $1^{\prime \prime}(2.54 \mathrm{~cm})$ air gap

C. PVC drain reducer
D. Center of drain should be 23" ( 58.4 cm ) from front of door, with or without the $3 / 4^{\prime \prime}(1.91 \mathrm{~cm})$ panel on the door. The drain should also be centered from left to right (75/16" [18.58 cm] from either side of the ice maker).
