## Thank you for buying a BISSELL Healthy Home Vacuum™

Everything we know about floor care went into the design and construction of this complete, high-tech home cleaning system.

We trust that it will bring you many years of satisfaction. It is backed with a limited two-year warranty. We also stand behind it with a knowledgeable, dedicated Consumer Services department, so, should you ever have a question, you'll receive fast, considerate assistance.

My great-grandfather invented the floor sweeper in 1876. Today, BISSELL is a global leader in the design, manufacture, and service of high quality homecare products like your Healthy Home Vacuum.

Thanks again, from all of us at BISSELL.

mar 1. Jusell Mark J. Bissell

President and Chief Executive Officer

# **IMPORTANT SAFETY INSTRUCTIONS**

When using an electrical appliance, basic precautions should be observed, including the following:

## READ ALL INSTRUCTIONS **BEFORE USING YOUR** UPRIGHT VACUUM.

Always connect to a polarized outlet (one slot is wider than the other). Unplug from outlet when not in use and before conducting maintenance.

## **⚠ WARNING:** To reduce the risk of fire, electric shock, or injury:

- Do not modify the polarized plug to fit a non-polarized outlet or extension cord.
- Do not leave vacuum cleaner unattended when it is plugged in.
- Unplug from outlet when not in use and before servicing.
- Do not use outdoors or on wet surfaces.
- Do not allow children to operate vacuum cleaner or use as a toy.
- Close attention is necessary when used by or near children.
- Do not use for any purpose other than described in this User's Guide.
- Use only manufacturer's recommended attachments.
- Do not use with damaged cord or plug.
- If appliance is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, have it repaired at an authorized service center.
- Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run appliance over cord. Keep cord away from heated surfaces.
- Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
- Do not handle vacuum cleaner or plug with wet hands.
- Do not put any object into openings. Do not use with any opening blocked; keep openings free of dust, lint, hair, and anything that may reduce air flow.
- Keep hair, loose clothing, fingers, and all parts of body away from openings and moving parts.

- Turn off all controls before plugging or unplugging vacuum cleaner.
- Use extra care when cleaning stairs.
- Unplug before attaching the TurboBrush.
- Do not pick up flammable materials (lighter fluid, gasoline, kerosene, etc.) or use in the presence of explosive liquids or vapors.
- Do not pick up toxic material (chlorine bleach, ammonia, drain cleaner, etc.).
- Do not use vacuum cleaner in an enclosed space filled with vapors given off by oil base paint, paint thinner, some moth proofing substances, flammable dust, or other explosive or toxic vapors.
- Do not pick up hard or sharp objects such as glass, nails, screws, coins, etc.
- Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
- Do not use without filters in place.
- Use only on dry, indoor surfaces.
- Keep appliance on a level surface.
- Do not carry the vacuum cleaner while it is running.
- Brush may unexpectedly restart. Unplug from outlet when cleaning or servicing.

# SAVE THESE **INSTRUCTIONS FOR FUTURE USE**

# THIS APPLIANCE HAS A POLARIZED PLUG.

To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install a proper outlet. Do not change the plug in any way.

This model is for household use only.

## **Assembling your vacuum**

#### Tool required: Phillips screwdriver

- Slide upper handle onto lower handle. Insert one screw into hole marked with an arrow and tighten until snug.
- Attach hose by lining up the tabs on the collar with the corresponding notches on the back of the vacuum as shown. Turn clockwise to lock the hose into place.
- Wrap the hose by routing it down and into the lower hose clip then up and over the top of the handle. Insert the hose wand fully into the hose base.

Note: It is important that the hose is fully inserted into the base for the suction air to be directed properly to the foot during floor vacuuming.

- Store TurboBrush on the front of the handle by aligning the slot at the bottom with the tab and snapping into place.
- Place crevice tool inside telescoping extension wand. Store tools on vacuum as shown.

# **CAUTION:**

Do not plug in your vacuum cleaner until you are familiar with all instructions and operating procedures.

800.237.7691

www.bissell.com

## Using your vacuum cleaner

### Transporting your cleaner

Use the handle on the front to carry the cleaner or place the cleaner in the upright position and tip back to roll on the rear wheels.

### Releasing the power cord

The upper and lower cord wraps rotate to allow for quick and easy removal of the power cord.

# Fingertip power switch

The power button is located at the top of the vacuum handle.

To turn cleaner on, press 🐧 button once.

To turn cleaner OFF, press 🐧 button again.

Note: The rotating brush will not turn on unless the unit is in the reclined position and the brush switch is on.

## Handle positions

Use your foot to pull the handle release pedal back to recline the vacuum cleaner.

## Height adjustment

There are seven height settings available for various floor surfaces. Turn the dial on the foot of the cleaner to the desired setting.

Lowest setting - For bare floors.

Medium settings - For short and medium pile carpets.

High setting - For plush carpet.

Note: For optimal cleaning performance, adjust to the lowest practical setting. If your cleaner is difficult to push, adjust to the next higher setting.

If the dial is difficult to turn, tilt the cleaner back slightly to take the weight off The foot while turning.

# ATTENTION:

Some Berber carpets have a tendency to fuzz with wear. Repeated strokes in the same area may aggravate this condition. Consider setting your cleaner on a higher than normal setting for this type of carpet.

## Using your vacuum continued

### Fingertip brush switch

The rotating brush is turned on or off using the switch at the side of the top of the handle. The brush will start rotating when the unit is reclined. The brush should be on for most carpeted floors. You may want to turn the brush off for bare floor cleaning or other delicate surfaces.

To turn the brush ON, press 💍 button once.

To turn the brush OFF, press 🐧 button again.

### Brush auto shut-off feature

When your cleaner is in the upright position, the brush will not rotate. The brush will rotate only when the cleaner is in the reclined position and the brush switch is on.

### Microban® antimicrobial product protection

Microban® antimicrobial protection fights the growth of odor causing bacteria, mold and mildew in your vacuum. It is built-in to key components during the manufacturing process and won't wash off or wear away. Microban provides continuous antimicrobial product protection for the useful lifetime of the product keeping your vacuum cleaner and fresher.

> Note: This should not replace normal cleaning and maintenance procedures.

Microban is a registered trademark of Microban Products Company.

#### Acarosan® Dust Mite Control

As part of a complete cleaning program, use BISSELL Acarosan dust mite powder and spray. To kill dust mites lurking in your home, use the Acarosan powder on your carpet and rugs, and use the spray on your bed, pillows and upholstery. The Acarosan spray comes with a trigger for easy use. Just untwist the cap on the bottle, and replace with the trigger which has been provided. Twist the trigger on to secure. For complete use instructions and further information, please see the labeled products or log on to www.acarosan.com. To re-order, see Replacement Parts on pg. 19.

Acarosan is a trademark of Allercopharma.

800.237.7691

www.bissell.com

# Using the tools

- 1 Make sure the cleaner is in the upright position.
- Remove the hose wand from the wand base. This automatically diverts the suction to the hose. Unwind the hose from the cleaner.

Note: To help prevent the machine from tipping, the hose should remain in the bottom hose clip.

Use the hose and wand alone or attach any of the tools to the end of the hose wand.

#### TurboBrush

Use rotating brush action for small areas such as stairs and upholstery.

Note: Press gently when using the TurboBrush to gain maximum cleaning. Too much pressure could cause the brush to stop rotating.

## **Combination brush**

Use longer soft bristles for dusting.

Remove long bristle portion and use shorter stiff bristles when agitation is needed to remove debris.

#### Crevice tool

Use in tight narrow spaces

## Telescoping extension wand

Use with desired attachment for a longer reach. To extend the wand, twist the collar to "Unlock" and push away from you. Twist the collar to "Lock" to lock into place. To retract, twist to unlock, pull toward you and twist to relock.

All items may not be included with your model. Other tools are available; to order, please refer to page 18-19.

# ATTENTION:

Always place the vacuum cleaner on the floor in its fully upright position when using tools. Placing the vacuum in this position automatically stops the rotating brush.

# **△CAUTION:**

To avoid personal injury and to prevent the cleaner from falling when cleaning stairs, always place it at the bottom of the stairs.

800.237.7691

www.bissell.com

)

# **E**mptying the dirt container

Empty the dirt container as soon as the dirt reaches the "Full" line on the side of the container.

- 1. Press the release button on top of the carrying handle to remove the dirt container.
- 2. Choose an emptying method. Method #2 is recommended for allergy sufferers.

Method #1 — hold the dirt container over trash can and push the emptying button to open the bottom (2a). Close the bottom after the dirt empties.

Method #2 – place a plastic bag over the bottom of the dirt container. Push the emptying button through the plastic to open the bottom (2b). After the dust settles, close the bottom and remove the bag to discard.

3. Replace dirt container on cleaner by aligning the bottom and pushing back until it snaps into place.

# **△CAUTION:**

Make sure vacuum cleaner has been switched off and unplugged before removing dirt container.

800.237.7691

www.bissell.com

## **Maintenance** and care

### Cleaning the dirt container

Additional steps can be taken to clean the dirt container as necessary.

- 1. Ensure the dirt container has been emptied.
- Remove the lower portion by pressing the front and back latches on the upper portion as shown.
- 3. Clean the screen with a cloth or soft brush to remove dust or debris.
- If desired, the lower dirt container may be washed in warm water. Make sure it is completely dry before reassembling.
- 5. To reassemble, hold the carry handle and place the upper portion into the lower portion, lining up the front and back latches. Push down until both latches click into place. Make sure the dirt container is securely assembled before replacing it on machine.

### Cleaning the foam filter

The foam filter should be checked monthly and washed as needed to maintain performance. More or less frequent cleaning may be required based on individual vacuuming habits and types of debris picked up.

- The foam filter is located in the tray labeled "Filter" underneath the dirt container. Pull the tray out to access the filter.
- Remove foam filter from tray and hold under running water to wash. Mild detergent may also be used if desired. Wring excess water from filter. Air dry thoroughly before replacing.

# **△WARNING**:

To reduce the risk of electric shock, turn power switch OFF and disconnect polarized plug from electrical outlet before performing maintenance or troubleshooting checks.

# **<b>MARNING:**

Do not operate the cleaner with a damp or wet filter or without all the filters in place.

**10** www.bissell.com

#### Replacing the HEPA filter cartridge

The HEPA filter cartridge should be replaced every six months or if suction is declining. More or less frequent replacing may be required based on individual vacuuming habits and types of debris picked up.

Note: To have the benefits of the Airtight™ HEPA System, you must use the BISSELL HEPA filter cartridge.

- 1. To remove the HEPA filter cartridge, push down on the filter door latch and pull door away from the cleaner.
- 2. Lift the tab at the top of the HEPA filter cartridge and pull cartridge away from the cleaner.
- 3. Replace the used HEPA filter cartridge with a new one.

Note: To avoid damaging the HEPA filter cartridge and reducing its filtration capabilities, be careful not to touch the filter material. The HEPA filter cartridge is not washable.

800.237.7691

ug203-1369\_5770\_706.indd 11

### **Clearing clogs**

Low suction or poor pickup may be due to a clog in the vacuum cleaner. If you notice a change in the sound of the motor or a reduction in the spinning action in the dirt container, check for a clog.

If there is no suction or if suction is reduced at the hose, follow these steps to check for and clear the clog:

- 1. Unplug cleaner from electrical outlet.
- Check the foam filter and clean as necessary (see cleaning your foam filter on page 10).
- 3. Check the HEPA filter and replace if necessary (see replacing the HEPA filter cartridge on page 11).
- **4.** Check to see if dirt container is full. Empty if needed.
- Remove lower portion of dirt container. Clean the screen and check center tubes for dirt accumulation.
- While dirt container is removed, check dirt inlet for clogs.
- Remove the hose from the cleaner by twisting the collar counterclockwise. Straighten the hose and check for a clog.
- 6. Check diverter area at back of machine for diverter position and clogs. When the hose wand is removed from the base, the diverter should be up (8a). If a clog is visible near the diverter, the plastic cover may be removed to clear the clog by removing the 7 screws as shown (8b).

# $oldsymbol{\Delta}$ warning:

To reduce the risk of electric shock, turn power switch off and disconnect polarized plug from electrical outlet before performing maintenance or troubleshooting checks.

12 www.bissell.com

#### Clearing clogs continued

If suction is normal at the hose, follow these steps to check for and clear the clog for floor cleaning:

- Check diverter area at back of machine for diverter position and clogs. When the hose wand is inserted in the base, the diverter should be down. If a clog is visible near the diverter, the plastic cover may be removed to clear the clog by removing the 7 screws as shown in illustration 8b above.
- Check the foot hose for clogs (2a). If you are not able to tell from the outside if a clog is present, remove the bottom 4 screws from the diverter cover to loosen and straighten the foot hose (2b).

Remove any clogs found and fully reassemble the cleaner before attempting to check suction again or using the cleaner.

An internal thermal protector has been designed into your cleaner to protect it from overheating. When the thermal protector activates, the main vacuum motor will stop operating. If this happens, proceed as follows.

- 1. Turn the cleaner OFF and unplug from electrical outlet.
- Check the cleaner for the source of overheating problem (i.e. full dirt cup, dirty filters or clog).
- 3. Fix the problem by following the steps in the maintenance section of the user guide.
- 4. When the motor cools for approximately 30 minutes, the thermal protector automatically resets and cleaning may continue. If the cleaner will not turn on or the thermal protector continues to activate, your cleaner may need servicing. Call BISSELL Consumer Services or visit the website.

Note: The thermal protector controls the main vacuum motor only, not the brush motor. If the thermal protector activates, the brush will continue to operate normally; however, there will be no suction.

#### **Brush reset**

If something becomes lodged in the foot and the brush shuts off, turn the cleaner off and unplug from the outlet. Remove the obstruction. The brush will automatically reset when the cleaner is plugged in and turned back on.

### **Brush maintenance**

The rotating brush should be checked regularly for accumulating debris that might reduce the cleaning performance of your vacuum.

- 1. Unplug cleaner from electrical outlet.
- 2. Recline the handle and turn your cleaner over so the bottom side is up.
- **3.** Carefully cut away any visible hair, fibers or debris from the brush roll.

Do not attempt to disassemble the vacuum foot or to remove the brush roll. If you feel it needs to be checked or replaced, call BISSELL Consumer Services or visit the website to locate an authorized service center.

#### **Belt maintenance**

The brush belt is designed to last the useful life of the cleaner when used according to all instructions in the user guide under normal household conditions. If you feel that it needs to be checked or replaced, call BISSELL Consumer Services or visit the website to locate an authorized service center. Do no attempt to disassemble the vacuum foot or to change the belt.

# **△CAUTION:**

To reduce the risk of injury from moving parts, turn off the vacuum cleaner and disconnect power plug from electrical outlet.

### Changing the light bulb

- 1. Unplug cleaner from electrical outlet.
- 2. Recline handle for easier access to light bulb and remove screw to lift off lens.
- Remove the bulb by grasping bulb and pulling straight out of the socket. Install the new bulb by pushing gently into the socket until the bulb snaps into place.

The TurboBrush should be checked regularly for clogs or debris wrapping around the brush.

- 1. Remove tool from hose or front of vacuum.
- 2. Twist collar so opening is at the top and lift top cover to remove.
- 3. Remove the brush from the belt and clean debris.
- **4.** Replace the brush inside the belt and place ends into slots on sides as shown.
- 5. Reposition top cover and twist collar until opening is at the bottom to lock into place.

ug203-1369\_5770\_706.indd 15

# **Troubleshooting**

To reduce the risk of electric shock, turn power OFF and disconnect polarized plug from electrical outlet before performing maintenance or troubleshooting.

#### Vacuum cleaner won't turn on Possible causes

- 1. Power cord not plugged in
- 2. Blown fuse/tripped breaker
- 3. Thermal protector activated

# Remedies 1 Check el

- 1. Check electrical plug
- 2. Check/replace fuse or reset breaker.
- **3.** Allow cleaner to cool for 30 minutes, see pg. 13.

### **Brush not rotating**

#### Possible causes

- 1. Brush switch turned to "Off"
- 2. Vacuum is in upright position
- 3. Brush is jammed
- 4. Brush needs to be reset

#### Remedies

- 1. Make sure brush switch is in "On" position
- 2. Recline vacuum to operate brush
- 3. Remove obstruction or debris (pg. 14), unplug cleaner to reset brush (pg. 14)
- 4. Unplug cleaner to reset brush (pg. 14)

# Vacuum cleaner won't pick up or low suction

#### Possible causes

- 1. Incorrect height setting
- 2. Hose wand not properly positioned
- 3. Dirt container not installed properly
- 4. Dirt container full
- 5. Clog in cleaner
- 6. Filters are dirty
- 7. Hose not properly attached

#### Remedies

- 1. Turn dial to lower setting
- 2. Make sure hose wand is fully seated in base and diverter is in down position
- **3.** Check assembly of upper and lower portions, correctly position and snap into place
- 4. Empty dirt container
- **5.** Follow instructions on pg. 12-13 for clearing clogs
- **6.** Check and clean foam filter, check and replace HEPA filter cartridge if needed
- 7. Make sure hose collar is twisted to lock position

# Troubleshooting continued

# Vacuum cleaner is difficult to push Possible causes

1. Incorrect height setting

#### Remedies

1. Turn dial to higher setting

#### Visible dust escaping from cleaner Possible causes

- 1. Filter tray missing or not installed properly
- 2. Foam filter missing or not installed properly
- 3. HEPA filter cartridge missing or not installed properly
- 4. Dirt container not installed properly
- 5. Dirt container not assembled properly
- 6. Hose not installed properly
- 7. Hole or crack in hose

#### Remedies

- 1. Check filter tray to make sure it is fully inserted
- 2. Check foam filter for correct installation
- 3. Check HEPA filter cartridge for correct installation
- **4.** Make sure dirt container is correctly positioned and snapped into place
- **5.** Check screen, upper and lower portions of the dirt container for proper assembly
- Make sure hose wand is fully seated in base, make sure foot hose is properly attached to diverter area
- 7. Check hose for holes or cracks and replace if needed

Other maintenance or service not included above should be performed by an authorized service representative.
