Electrical Requirements

Single Speedcook Installation

Product rating is 120/208 or 120/240 volt, 60 Hz, 30 amps. This product must be connected to a supply circuit of the proper voltage and frequency and protected by a time delay fuse or circuit breaker. The power supply should be brought to a separate 30 ampere branch circuit. Wire size must conform to the requirements of the National Electric Code or the prevailing local code.

Combined Speedcook and Wall Oven Installation:

When installed in combination with a GE single wall oven, use separate electrical junction boxes,

OR,

Install a single junction box connected to 50 amp supply circuit or properly rated supply circuit.

• Refer to single oven installation instructions for electrical requirements of that product.

• These connections must be made by a qualified electrician. All electrical connections must meet National Electrical code or prevailing local codes.

Combined Speedcook and Warming Drawer Installation:

When installing the Speedcook oven over a GE electric warming drawer, a separate 120V, 60Hz, properly grounded receptacle must be installed. See instructions packed with the warming drawer.

Installation Requirements

• These ovens may be installed directly into a wall or wall oven cabinetry, 30" minimum width.

• The front surface of the oven will be nearly flush with surrounding cabinetry doors.

• This oven can be installed over any GE single electric built-in oven or a single GE electric built-in warming drawer.

• This oven must be installed at least 36" above the floor.

IMPORTANT: This oven is not approved for use above another built-in Speedcook oven, side by side or under the countertop installations.

• For personal safety, this oven cannot be installed in a cabinet arrangement such as an island or peninsula.

• Cabinets installed adjacent to wall ovens must have an adhesion spec of at least 194°F temperature rating.

• Allow for clearance to adjacent corners, walls, drawers, etc.

Single Speedcook Installation

30"   19" Min

28-1/2"

21"

Construct Solid Bottom Min. 3/8" Plywood Supported by 2 x 4 or 1 x 2 Runners, all Four Sides
36-3/4" Min. Required

Order a 30" wide single oven cabinet or cut the opening in a wall to dimensions shown.
The rough opening must be:

• Depth – 19" Min.

• Width – 28-1/2" Min.

• Height – 21" Min.

• 36-3/4" from the floor to the cutout is required.

• These ovens require 3/4" overlap on each side, top and bottom of the cutout.

• Oven overlaps will conceal cut edges on all sides of the opening.

Speedcook Oven Installation above a GE Warming Drawer

30"   24" Min.

Construct Solid Bottom Min. 3/8" Plywood Supported by 2 x 4 or 1 x 2 Runners, all Four Sides

28-1/2"

21"

2" Min.

9-1/4"

Install 2 x 4 or 2 x 2 Runners or Solid Bottom, Must Support 100 lbs.

36-3/4" Min.

Note: Additional clearance between the cutouts may be required. Check to be sure the oven supports above the warming drawer location do not obstruct the required interior 23-1/2" depth and 9-1/4" height. See installation instructions for details.
